REPORT OF THE DIRECTORS

The Board has the pleasure of presenting their Report on the affairs of Mutual Benefits Assurance Plc (“the Company”) and its subsidiaries (together “the Group”) to the Shareholders along with the Group and the Company’s Audited Financial Statements and the Auditors’ Report for the year ended 31 December 2024.

LEGAL STATUS AND PRINCIPAL ACTIVITY

Mutual Benefits Assurance Plc was incorporated on the 18th day of April 1995 under the name Mutual Benefits Assurance Company Limited. The Company was converted and re-registered as a Public Limited Liability Company on 24 May 2001 and became listed on the Nigerian Stock Exchange (NSE) on 28 May 2002.

The Company’s Head Office is located at “Aret Adams House”, 233, Ikorodu Road, Ilupeju, Lagos. It has branches and retail outlets spread across the nation in Abeokuta, Abuja, Ado - Ekiti, Akure, Port Harcourt, Warri, Lagos, Benin, Calabar, Ikorodu, Ilorin, Ibadan, Kaduna, Kano, Oshogbo, Otta, Owerri and Yenogoa.

The Company is registered with the National Insurance Commission (NAICOM) and mainly provides Non-life insurance and risk management services to organizations and private individuals.

The Company has five subsidiary companies namely: Mutual Benefits Life Assurance Limited, Mutual Benefits Assurance Company Liberia, Mutual Benefits Assurance Niger SA, Mutual Benefits Homes and Properties Limited and Mutual Benefits Microfinance Bank Limited.

Mutual Benefits Life Assurance Limited: This subsidiary was incorporated in Nigeria in 2007 as a Private Limited Liability company and was issued a license to carry on Life Insurance Business by NAICOM. The company's principal activity continues to be the provision of life insurance, deposit administration and risk management solutions to corporate and retail customers.

Mutual Benefits Assurance Company Liberia: The company was incorporated in Liberia in 2008. It is licensed to provide Life and Non-life insurance and risk management services to both individual and corporate clients.

Mutual Benefits Assurance Niger SA: The company commenced operations in January 2014 and is headquartered in Niamey, Niger, with a focus on delivering qualitative Life and Non-life insurance and risk management services to corporate and individual customers.

Mutual Benefits Homes and Properties Limited: This private company was incorporated in Nigeria in January 2008. Its principal activity is to carry on the business of real estate development, management and investment.

Mutual Benefits Microfinance Bank Limited: is a State Microfinance Bank that was incorporated in Nigeria in January 2009. The principal activity of the Bank is the provision of microfinance banking services to corporate and individual clients at the state level. These services include taking deposits, granting loans and advances.

EVENT AFTER THE REPORTING DATE

As disclosed in Note 53 to the consolidated and separate financial statements, aside from the proposed dividend payment by the Board of Directors, there were no significant events after the reporting date which could have had material effect on the financial position of the Group and the Company as at 31 December 2024 which have not been recognised or disclosed.

EMPLOYMENT AND HUMAN RESOURCES (HR) MATTERS

(i) Employee Involvement and Training

The Company recognises that the acquisition of knowledge is continuous, and that to foster commitment, its employees need to hone their awareness of factors: economic, financial or otherwise, that affects its growth. To this end, the Company in the execution of its training programmes (both local and international) encourages and provides the opportunity for its staff to develop and enhance their skills, awareness and horizon.

Gender Analysis

The number and gender analysis of the total workforce of the Company is as follows:

	Male Number	Female Number	Male %	Female %
Employees	98	64	60	40
Gender analysis of Board and Top				
Board	8	1	89	11
Top Management	6	5	55	45

Gender Analysis

Detailed analysis of the Board and Top Management is as follows:

	Male Number	Female Number	Male %	Female %
Assistant General Manager	3	3	50	50
Deputy General Manager	1	1	50	50
General Manager	2	1	67	33
Executive Director	2	0	100	0
Chief Executive Officer	1	0	100	0
Non-Executive Director	6	1	86	14

(ii). Employment of Physically Challenged Persons

The Company adopts a non-discriminatory policy of giving fair consideration to applications for employment including those received from physically challenged persons having regard to their particular aptitudes and abilities. The Company had no disabled persons in its employment in 2024 (2023: Nil)

(iii). Employee Health Safety and Welfare

The Company maintains business premises designed with a view to guaranteeing the safety and healthy living conditions of its employees and customers alike. Employees are adequately insured against occupational and other hazards. In addition, free medical services are provided for the Company's employees and their immediate families through Health Management Organisations (HMO). Fire prevention and fire-fighting equipment are installed in strategic locations within the Company's premises. The Company also operates a contributory pension plan in line with the Pension Reform Act 2014.

Welfare facilities provided include: housing for employees (or payment of allowance in lieu), transport allowance; car loans or official cars. Incentive schemes designed to meet the circumstances of each individual are implemented wherever appropriate and some of these include promotions, salaries and wages review amongst others.

AUDITOR

Messrs. KPMG Professional Services, having satisfied the relevant corporate governance rules on their tenure in office have indicated their willingness to continue in office as auditor to the Group. In accordance with Section 401(2) of the Companies and Allied Matters Act (CAMA) 2020, therefore, the auditor will be reappointed at the next annual general meeting of the company without any resolution being passed.

COMPLIANCE WITH NAICOM CODE OF CORPORATE GOVERNANCE

In view of its commitment to the implementation of effective corporate governance principles in its business operations, the Company files Returns with the Securities and Exchange Commission (SEC), Financial Reporting Council (FRC), Nigerian Exchange Limited (NGX) and National Insurance Commission (NAICOM) as and when due, as required by extant rules and regulations.

Also, in line with the principles of Corporate Governance the Company made efforts to satisfy the requirement of convening a Board Meeting every quarter. The Board Committees established are equally viable and are working in line with their terms of reference.

By order of the Board

Jide Ibitayo
FRC/2013/NBA/00000003123
Company Secretary/ Legal Adviser

Date: 11 April 2025

CORPORATE GOVERNANCE REPORT

Mutual Benefits Assurance Plc remains committed to the principles and practices that promote good Corporate Governance. We recognize that sound corporate governance practices are necessary for effective management and control of the Company. Prior to the introduction of the Code of Corporate Governance for Companies in Nigeria, we had already adopted a responsible attitude towards Corporate Governance and issues of Corporate Social Responsibility in Nigeria. The Company conducts its business with integrity and pays due regard to the legitimate interest of all stakeholders.

The Company continues to comply with its Internal Governance Policies, the National Code of Corporate Governance 2018, and the sectoral Guideline issued by the National Insurance Commission. The Nigerian Code of Corporate Governance covers a wide range of issues including Board structure, Quality of Board Members, duties of the Board, conduct of the Board of Directors, rights of shareholders and committees of the Board.

THE BOARD OF DIRECTORS

The Board of Directors has the ultimate responsibility for the overall functioning of the Company. The responsibilities of the Board include setting the Company's strategic objectives and policies, providing leadership to put them into effect, supervising the management of the business, ensuring implementation of decisions reached at the Annual General Meeting, ensuring value creation to shareholders and employees, determination of the terms of reference and procedures of all Board Committees, ensuring maintenance of ethical standard as well as compliance with the laws of Nigeria. The Board consists of nine (9) Directors, made up of the Managing Director, two (2) Executive Directors and six (6) Non-Executive Directors, one of whom is the Chairman. The Directors are experienced stakeholders with diverse professional backgrounds in Insurance, Accounting, Banking, Commerce, Management, Business Development, Engineering, Government etc. The Directors are people of impeccable character and high integrity.

The Company is delighted to have a versatile Board with deep understanding of its responsibilities to Shareholders, Regulatory Authorities, Government and other Stakeholders. The Board always takes proactive steps to master and fully appreciate all cultural, legislative, ethical, institutional and all other factors, which impact our operations and operating environment. This has ensured that a culture of compliance with rules and regulation is entrenched at all levels of operations within the Company.

The meetings of the Board are scheduled well in advance and reports from Committees of the Board are circulated to all the Directors. The Board meets at least once quarterly and at other times as the need arises.

(a) RECORD OF DIRECTOR'S ATTENDANCE

In accordance with Section 318(3) of the Companies and Allied Matters Act 2020, the record of Directors' attendance and meetings held during year 2024 is available for inspection at the Annual General Meeting. The Board met three (3) times during the year and the meetings of the Board were presided over by the Chairman. Written notices of the Board meetings, along with the agenda were circulated at least fourteen days before the meetings. The minutes of the meetings were appropriately recorded and circulated.

(c) Enterprise Risk Management

i. Introduction and Overview

Mutual Benefits Assurance Plc has a clear and functional Enterprise Risk Management (ERM) framework that helps in identifying, assessing and managing the likely impact of risks faced by the Company.

ii. Enterprise-wide Risk Management Principles

At Mutual Benefits Assurance Plc, we try as much as possible to balance our portfolio of risks while maximizing value to stakeholders through an approach that mitigates the inherent risks and reward our business.

To ensure effective and economic development of resources, we operate strictly by the following principles:

- The Company will not take any action that will compromise its integrity.
- The Company will at all times comply with all government regulations and uphold best international practice.
- The Company will build an enduring risk culture, which shall pervade the entire organisation.
- The Company will at all times hold a balanced portfolio and adhere to guidelines on investment issued by regulator and Finance, Investment & Strategy Committee of the Board.
- The Company will ensure that there is adequate reinsurance in place for its businesses and also ensure prompt payment of such premiums.

iii. Approach to Risk Management

At Mutual Benefits Assurance Plc, there are levels of authority put in place for the oversight function and management of risk to create and promote a culture that mitigates the negative impact of risks facing the Company.

iv. The Board

The Board sets the organisation's objectives, risk appetite and approves the strategy for managing risks. There is a Board Committee on Risk Management which ensures that various functions are geared towards minimizing the impacts of risks faced by the Company.

v. The Statutory Audit Committee

This is a statutory Committee of the Company which is saddled with the following functions:

- Perform oversight function on accounting and financial reporting
- Liaise with the external auditor
- Ensure regulatory compliance
- Monitoring the effectiveness of internal control process within the Company

vi. The Audit & Risk Management Committee

This Committee oversees the business process. Their functions include:

- Reviewing of Company's risk appetite.
- Oversee management's process for identification of significant risk across the Company and the adequacy of prevention detection and reporting mechanisms.
- Review underwriting risks especially risks above management's limit for adequacy of reinsurance and Company's participation.
- Review and recommend for approval of the Board, risk management procedures and controls for new products and services.

vii. Finance, Investment & Strategy Committee

Sets the investment limit and the type of businesses the Company should invest in.

- Reviews and approves the Company's Investment Policy
- Approves investments over and above Management's approval limit.
- Ensures that there is optimal asset allocation in order to meet the targeted goals of the Company.

The second level is the management of the Company. This comprises the Managing Director and the Management Committee.

They are responsible for implementation of the Enterprise Risk Management policies and guidelines set by the Regulator, Government and the Board for risk mitigation. This is achieved through the business unit they supervise.

The third level is that of the independent assurance. This comprises the internal audit function that provides independent and objective assurance of the effectiveness of the Company's system of internal controls established by the first and second lines of defence in management of Enterprise Risk across the organisation.

MUTUAL BENEFITS ASSURANCE PLC
ANNUAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2024

REPORT OF THE STATUTORY AUDIT COMMITTEE

To the members of Mutual Benefits Assurance Plc

In accordance with the provisions of Section 404(7) of the Companies and Allied Matters Act, 2020, we the Members of the Statutory Audit Committee of Mutual Benefits Assurance Plc, having carried out our statutory functions under the Act, hereby report as follows:

- We have exercised our statutory functions under Section 404(7) of the Companies and Allied Matters Act, 2020, and we acknowledge that the scope and planning of both the external and internal audits for the year ended 31 December 2024 were satisfactory and reinforce the Company's Internal Control Systems.
- We confirm that the accounting and reporting policies of the Group are in accordance with legal requirements and agreed ethical practices.
- We are satisfied with the Management's responses to the external auditors' recommendations on accounting and internal control matters and with the effectiveness of the Company's system of accounting and Internal Control.
- We acknowledge the co-operation of Management and staff in the conduct of statutory responsibilities.

Mr Osato Aideyan
Chairman, Statutory Audit Committee

STATEMENT OF CORPORATE RESPONSIBILITY FOR THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024

Further to the provisions of section 405 of the Companies and Allied Matters Act (CAMA), 2020, we, the Managing Director/CEO and Chief financial Officer, hereby certify the financial statements of the Mutual Benefits Assurance Plc ("the Company") and its subsidiaries ("together referred to as "the Group") for the year ended 31 Dec 2024 as follows:

a. That we have reviewed the audited consolidated and separate financial statements of the Company for the year ended 31 December 2024.

b. That the audited consolidated and separate financial statements do not contain any untrue statement of material fact or omit to state a material fact which would make the statements misleading, in the light of the circumstances under which such statement was made.

c. That the audited consolidated and separate financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and results of operation of the Company as of and for, the year ended 31 December 2024.

d. That we are responsible for establishing and maintaining internal controls and have designed such internal controls to ensure that material information relating to the Company and its subsidiaries is made known to the officer by other officers of the companies, during the year ended 31 December 2024.

e. That we have evaluated the effectiveness of the Company's internal controls within 90 days prior to the date of audited consolidated and separate financial statements and presented in our separate report the conclusion about the effectiveness of the internal controls and procedures as of the end of the period covered in our separate report based on such evaluation.

f. That there were no significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our evaluation, including any corrective action with regard to significant deficiencies and material weakness.

g. That we have disclosed the following information to the Group's Auditors and Audit Committee:

(i) There are no significant deficiencies in the design or operation of internal controls which could adversely affect the Group's ability to record, process, summarise and report financial data, and have not identified for the Group's auditors any material weaknesses in internal controls, and

(ii) there is no fraud that involves management or other employees who have a significant role in the Company's internal control.

**STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE PREPARATION OF THE
CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS**

FOR THE YEAR ENDED 31 DECEMBER 2024

The directors accept responsibility for the preparation of the annual Consolidated and Separate financial statements that give a true and fair view in accordance with IFRS Accounting standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act. (CAMA), 2020 the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Insurance Act 2003 and relevant National Insurance Commission of Nigeria ("NAICOM") Circulars.

The directors further accept responsibility for maintaining adequate accounting records as required by the Companies and Allied Matters Act. (CAMA), 2020 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The directors have made assessment of the Group and Company's ability to continue as a going concern and have no reason to believe that the Group and Company will not remain a going concern in the year ahead.

Mutual Benefits Assurance Plc

Annual Reports for the Year Ended 31 December 2024

Certification Pursuant to Section 60 of the Investment and Securities Act, 2007

Report on the Effectiveness of Internal Control over Financial Reporting as of 31 December 2024

The management of Mutual Benefits Assurance Plc (“the Company”) is responsible for establishing and maintaining adequate internal control over financial reporting as required by the Investment and Securities Act 2007 and the Financial Reporting Council (Amendment) Act, 2023.

The management of Mutual Benefits Assurance Plc assessed the effectiveness of the internal control over financial reporting of the Company and its subsidiaries (together “the Group”) as of 31 December 2024 using the criteria set forth in Internal Control—Integrated Framework (2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission (“the COSO Framework”) and in accordance with the SEC Guidance on Implementation of Sections 60 – 63 of Investments and Securities Act, 2007.

As of 31 December 2024, the management of Mutual Benefits Assurance Plc did not identify any material weakness in its assessment of internal control over financial reporting.

As a result, management has concluded that, as of 31 December 2024, the Group’s internal control over financial reporting was effective.

The Company’s independent auditor, KPMG Professional Services, who audited the consolidated and separate financial statements included in this Annual Report, issued an unmodified conclusion on the effectiveness of the Group’s internal control over financial reporting as of 31 December 2024 based on the limited assurance engagement performed by them. KPMG Professional Services’ limited assurance report is included in the annual report.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred subsequent to the date of our evaluation of the effectiveness of internal control over financial reporting that significantly affected, or are reasonably likely to significantly affect, the Group’s internal control over financial reporting.

Independent Auditor's Limited Assurance Report

To the Shareholders of Mutual Benefits Assurance Plc

Report on Limited Assurance Engagement Performed on Management's Assessment of Internal Control Over Financial Reporting

Conclusion

We have performed a limited assurance engagement on whether internal control over financial reporting of Mutual Benefits Assurance Plc ("the Company") and its subsidiaries (together "the Group") as of 31 December 2024 is effective in accordance with the criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("the COSO Framework") and the Securities and Exchange Commission Guidance on Implementation of Sections 60 – 63 of Investments and Securities Act 2007.

Based on the procedures performed and evidence obtained, nothing has come to our attention to cause us to believe that the Group's internal control over financial reporting as of 31 December 2024 is not effective, in all material respects, in accordance with the criteria established in the COSO Framework and the Securities and Exchange Commission Guidance on Implementation of Sections 60 – 63 of Investments and Securities Act 2007.

Basis for conclusion

We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance Engagements Other Than Audits or Reviews of Historical Financial Information issued by the International Auditing and Assurance Standards Board (IAASB) and the Financial Reporting Council of Nigeria Guidance on Assurance Engagement Report on Internal Control over Financial Reporting. Our responsibilities are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA).

Our firm applies International Standard on Quality Management (ISQM) 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements, issued by the IAASB. This standard requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Other matter

We have audited the consolidated and separate financial statements of Mutual Benefits Assurance Plc in accordance with the International Standards on Auditing, and our report dated 7 July 2025 expressed an unmodified opinion of those consolidated and separate financial statements.

Our conclusion is not modified in respect of this matter.

Responsibilities for Internal Control over Financial reporting

The Board of Directors of Mutual Benefits Assurance Plc is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying management's report. Our responsibility is to express a conclusion on the Group's internal control over financial reporting based on our assurance engagement.

Our responsibilities

The Financial Reporting Council of Nigeria Guidance on Assurance Engagement Report on Internal Control over Financial Reporting ("the Guidance") requires that we plan and perform the assurance engagement and provide a limited assurance report on the Group's internal control over financial reporting based on our assurance engagement.

Summary of the work we performed as the basis for our conclusion

We exercised professional judgment and maintained professional skepticism throughout the engagement. As prescribed in the Guidance, the procedures we performed included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our engagement also included performing such other procedures as we considered necessary in the circumstances. We believe the procedures performed provide a basis for our report on the internal control put in place by management over financial reporting.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Definition and Limitations of Internal Control Over Financial reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted

accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Furthermore, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of **Mutual Benefits Assurance Plc**

Report on the Audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of Mutual Benefits Assurance Plc ("the Company") and its subsidiaries (together, "the Group"), which comprise:

- the consolidated and separate statements of financial position as at 31 December 2024;
- the consolidated and separate statements of profit or loss
- the consolidated and separate statements of other comprehensive income;
- the consolidated and separate statements of changes in equity;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Company and its subsidiaries as at 31 December 2024, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Insurance Act 2003 and relevant National Insurance Commission of Nigeria ("NAICOM") Circulars.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the consolidated and separate Financial Statements* section of our report. We are independent of the Group and Company in accordance with International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated and separate financial statements in Nigeria and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of Insurance Contract Liabilities

The Group and Company has significant life and non-life insurance contract liabilities. The valuation of insurance contract liabilities involves high estimation uncertainties and significant judgment over uncertain future outcomes. The measurement of insurance liabilities consists of the Liability for Remaining Coverage (LRC) and the Liability for Incurred Claims (LIC).

The Group and Company uses both the Premium Allocation Approach (PAA) and General Measurement Model (GMM) under IFRS 17. The PAA is applied for the measurement of the groups of insurance contracts in the non-life and group life segment while the GMM is applied for the measurement of the groups of insurance contracts in the individual life segment.

The result of the director's assessments regarding the calculation of the liability for incurred claims depends on inputs, the choice of actuarial methods and the precision of the Group's judgment in determining actuarial assumptions. Key assumptions with the greatest impact on the carrying of non-life insurance contracts involve economic assumptions about inputs such as inflation rate, discount rates as well as estimated future payments for claims, acquisition cashflows and the risk adjustment for non-financial risk hence the eventual outcome is uncertain.

The key actuarial assumptions used in the valuation of life insurance contract liabilities are judgmental, particularly with respect to the discount rates, lapse and surrender rates, mortality, longevity and morbidity rates, expense, risk adjustment, assets for acquisition cashflows and the amortization of the contractual service margin.

The level of complexity, the assumptions and judgment involved in estimating these amounts make insurance contract liabilities a matter of significance to our audit.

How the matter was addressed in our audit

Our audit procedures included the following, we:

- Evaluated the design, implementation and operating effectiveness of key controls implemented by the Group and the Company which includes review of data used for the valuation of insurance contract liabilities.
- Evaluated the Group's methodology to determine and allocate expected premium receipts to periods.
- Tested the completeness and accuracy of the data used in determining the assumptions, as well as for the actuarial calculations .
- With the assistance of our actuarial specialists we,
 - Evaluated management's PAA eligibility assessment, accuracy of insurance cohorts and the computation of insurance revenue for selected portfolios for each cohort under PAA and the GMM.
 - Evaluated the appropriateness of methods/models and assumptions to determine ultimate expected claims including ultimate claims ratios, frequency and severity of claims, payment patterns and estimate discount rate curves .
 - Assessed the assumptions used in estimating risk adjustments to evaluate whether it is in line with the requirements of the relevant accounting standard and industry practices.
 - Assessed whether the method/ model for determining future cash flows is in line with the requirements of the relevant accounting standard and standard industry practices.
- Assessed the appropriateness of the disclosures in the consolidated and separate financial statements related to the liability for incurred claims associated with the premium allocation approach and the general measurement model, considering the requirements of the relevant accounting standards.

Refer to Note 2.2 Changes in accounting policy and disclosures, Note 2.3.32 Significant accounting judgements, estimates and assumptions, Note 31 Insurance contracts.

Other Information

The Directors are responsible for the other information. The other information comprises the Corporate information, Financial highlights, Report of the Directors, Corporate governance report, Report of the Statutory Audit Committee, Statement of corporate responsibilities, Statement of directors' responsibilities,

Management Certification of Internal Control Over Financial Reporting, Report on the Effectiveness of Internal Control over Financial Reporting and Other national disclosures, but does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Consolidated and Separate Financial Statements

The Directors are responsible for the preparation of consolidated and separate financial statements that give a true and fair view in accordance with IFRS Accounting Standards and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Insurance Act 2003 and relevant National Insurance Commission of Nigeria ("NAICOM") Circulars, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures

are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the Group financial statements. We are responsible for the direction, supervision and review of group audit work performed for purposes of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Compliance with the requirements of Schedule 5 of the Companies and Allied Matters Act (CAMA), 2020.

- i. We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
- ii. In our opinion, proper books of account have been kept by the Company, so far as appears from our examination of those books and proper returns adequate for the purposes of our audit have been received from branches not visited by us.
- iii. The Company's statement of financial position and statement of profit or loss and other comprehensive income are in agreement with the books of account and returns.

Penalties

The Company paid penalties in respect of contravention of the requirements of the Security and Exchange Commission during the year ended 31 December 2024. Details of penalties are disclosed in note 52 to the consolidated and separate financial statements.

Compliance with FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting

In accordance with the requirements of the Financial Reporting Council of Nigeria, we performed a limited assurance engagement and reported on management's assessment of the Group's internal control over financial reporting as of 31 December 2024. The work performed was done in accordance with ISAE 3000 (Revised) *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* and the FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting. We have issued an unmodified conclusion in our report dated 7 July 2025. That report is included in of the Annual Report.

The accompanying summary of significant accounting policies and notes to the consolidated and separate financial statements are an integral part of these consolidated and separate financial statements.

MUTUAL BENEFITS ASSURANCE PLC
ANNUAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2024

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate information

These financial statements are the consolidated and separate financial statements of Mutual Benefits Assurance Plc (“the Company”) and its subsidiaries (hereafter referred to as the ‘the Group’). The address of the registered office is: Aret Adams House, 233 Ikorodu Road, Ilupeju, Lagos.

Mutual Benefits Assurance Plc (“the Company”) (RC 269837) was incorporated as a private limited liability company on 18 April 1995, granted the Certificate of Registration as an insurer by the National Insurance Commission (NAICOM) on September 1995 and commenced operations on 2 October 1995 and became a public liability company on 24 May 2001. Mutual Benefits Assurance Plc is a financial, wealth protection company in Nigeria. The Company is listed on the Nigerian Stock Exchange.

The Company invests policy holders funds and pays claims arising from insurance contract liabilities in line with the provisions of Insurance Act, CAP 117, Law of the Federal Republic of Nigeria 2004 and NAICOM prudential guidelines.

The principal activities of the subsidiaries and information of the Group’s structure are disclosed in Note 26. Information on other related party relationships of the Group is provided in Note 50.

The consolidated and separate financial statements of the Company and its subsidiaries were authorised for issue by the Board of Directors on 11 April 2025.

Going Concern

The consolidated and separate financial statements have been prepared on the going concern basis and there is no intention to curtail business operations. Capital adequacy and liquidity ratios are continuously reviewed and appropriate action taken to ensure that there are no going concern threats to the operation of the Group.

The Directors have made assessment of the Group's and the Company’s ability to continue as a going concern and have no reason to believe that the Group and the Company will not remain a going concern in the years ahead.

2.1 Basis of presentation

Statement of compliance with IFRS

These consolidated and separate financial statements of the Company and its subsidiaries have been prepared in accordance with the IFRS Accounting Standards issued by the International Accounting Standards Board (IFRS Accounting Standards). Additional information required by national regulations has been included where appropriate.

The consolidated and separate financial statements comprise of the statements of profit or loss, statements of other comprehensive income, the statements of financial position, the statements of changes in equity, the statements of cash flows, summary of material accounting policies and the notes.

The consolidated and separate financial statements values are presented in Nigerian Naira (₦) rounded to the nearest thousand (₦’000), unless otherwise indicated.

The Group presents its statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after the reporting date (no more than 12 months) and more than 12 months after the reporting date (more than 12 months) is presented in the respective notes.

(a) Basis of measurement

These consolidated and separate financial statements have been prepared on the historical cost basis, except for the following items, which are measured on an alternative basis on each reporting date:

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Items	Measurement Bases
Item of building (property, plant and equipment)	Revalued amount
Non-derivative assets at fair value through profit or loss (FVPL)	Fair value
Non-derivative assets at fair value through other comprehensive income (FVOCI)	Fair value
Investment properties	Fair value
Insurance contract liabilities	Present value

(b) Use of estimates and judgements

The preparation of the financial statements in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

Information about significant areas of estimation uncertainties and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in Note 2.3.32.

2.2 Changes in accounting policy and disclosures

2.2.1 Changes in material accounting policies

The Group does not have changes in material accounting policies in the current annual reporting period.

2.2.2 New and Revised Standards issued but not yet effective

At the date of authorisation of the financial statements of the Group (and/or Company) for the year ended 31 December 2024, the following IFRS Accounting Standards, Amendments to IFRS Accounting Standards and Interpretations were in issue but not yet effective.

Except for those IFRS Accounting Standards, Amendments to IFRS Accounting Standards and Interpretations that are not applicable to the entity, all IFRS Accounting Standards, Amendments to IFRS Accounting Standards and Interpretations will be adopted at their effective date unless otherwise indicated.

i. IFRS 18 Presentation and Disclosures in Financial Statements

IFRS 18 Presentation and Disclosure in Financial Statements replaces IAS 1 Presentation of Financial Statements. The new standard introduces the following key new requirements:

- It promotes a more structured income statement, in particular, it introduces a newly defined ‘operating profit’ subtotal and a requirement for all income and expenses to be classified into three new distinct categories, operating, investing, and financing, based on a company’s main business activities.
- All companies are required to report the newly defined ‘operating profit’ subtotal – an important measure for investors’ understanding of a company’s operating results – i.e. investing and financing results are specifically excluded. This means that the results of equity-accounted investees are no longer part of operating profit and are presented in the ‘investing’ category.
- Management-defined performance measures (MPMs) are disclosed in a single note in the financial statements.
- Enhance guidance is provided on how to group information in the financial statements. This includes guidance on whether information is included in the primary financial statements or is further disaggregated in the notes. Companies are discouraged from labelling items as ‘other’ and will now be required to disclose more information if they continue to do so.
Entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.
- It also requires Companies to analyse their operating expenses directly on the face of the income statement – either by nature, by function or using a mixed presentation. If any items are presented by function on the face of the income statement (e.g. cost of sales), then a company provides more detailed disclosures about their nature

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The Group is still in the process of assessing the impact of the new standard, particularly with respect to the structure of the Group's statement of profit or loss, the statement of cash flows and the additional disclosures required for MPMs. The Group is also assessing the impact on how information is grouped in the financial statements, including for items currently labelled as 'other'.

The directors are of the opinion that the impact of the application of the remaining IFRS Accounting Standards, Amendments to IFRS Accounting Standards and Interpretations will not have a material impact on the financial statements as follows:

- i. Lack of exchangeability (Amendment to IAS 21)
- ii. Amendments to the Classification and Measurement of Financial Instruments (Amendment to IFRS 9 and IFRS 7)
- iii. Amendments to IFRS 9 and IFRS 7 Contracts Referencing Nature-dependent Electricity
- iv. Annual Improvements to IFRS Accounting Standards (Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7)
- v. Subsidiaries without Public Accountability: Disclosures (IFRS 19)

2.3. Material accounting policies

Except for the effect of the changes in accounting policies as disclosed in **Note 2.3.32.1**, if any, the group has consistently applied the following accounting policies to all periods presented in these financial statements

2.3.1 Basis of Consolidation

The consolidated and separate financial statements comprise the financial statements of the Group and its investees that are considered subsidiaries as at 31 December 2024. Subsidiaries are investees that the Group has control over. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- (a) Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- (b) Exposure, or rights, to variable returns from its involvement with the investee; and
- (c) The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) The contractual arrangement with the other vote holders of the investee
- (b) Rights arising from other contractual arrangements
- (c) The Group's voting rights and potential voting rights

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of OCI are attributed to the owners of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction (transactions with owners).

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, noncontrolling interest and other components of equity, while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

2.3.2 Product classification

Insurance contracts are those contracts where the Group (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Group determines whether it has significant insurance risk, by comparing benefits payable after an insured event with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Investment contracts are those contracts that transfer significant financial risk, but not significant insurance risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of price or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire. Investment contracts can, however, be reclassified as insurance contracts after inception if insurance risk becomes significant.

2.3.3 Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 *Financial Instruments*, is measured at fair value with the changes in fair value recognised in the statement of profit or loss in accordance with IFRS 9. Other contingent consideration that is not within the scope of IFRS 9 is measured at fair value at each reporting date with changes in fair value recognised in profit or loss.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

2.3.4 Foreign currency translation

The Group's consolidated financial statements are presented in Naira which is also the parent company's functional currency. Each company in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. The Group uses the direct method of consolidation and on disposal of a foreign operation, the gain or loss that is reclassified to profit or loss reflects the amount that arises from using this method.

2.3.4.1 Transactions and balances

Transactions in foreign currencies are initially recorded by the Group's entities at their functional currency spot rate prevailing at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate of exchange at the reporting date.

All differences arising on settlement or translation of monetary items are taken to the statement of profit or loss with the exception of differences on foreign monetary items that form part of a net investment in a foreign operation. These are recognised in OCI until the disposal of the net investment, at which time they are reclassified to profit or loss. Tax charges and credits attributable to exchange differences on these monetary items are also recorded in OCI.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction and are not subsequently restated. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of a gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

2.3.4.2 Group companies

On consolidation, the assets and liabilities of foreign operations are translated into Naira at the rate of exchange prevailing at the reporting date and their statement of profit or loss is translated at exchange rates prevailing at the date of the transactions. The exchange differences arising on the translation for consolidation are recognised in Statement of Other Comprehensive Income (SOCI). On disposal of a foreign operation, the component of SOCI relating to that particular foreign operation is reclassified to Statement of Profit or Loss.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the rate of exchange at the reporting date.

2.3.5 Segment reporting

For management purposes, the Group is organised into business units based on their products and services and has three reportable operating segments; assurance business, real estate and microfinance bank.

A segment is a distinguishable component of the Group that is engaged in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. The Group's primary format for segment reporting is based on business segments i.e life business, real estate and microfinance.

Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

consolidated financial statements.

2.3.6 Revenue recognition

Revenue comprises premium, fee & Commissions, investment income, value for services rendered, net of value-added tax, after eliminating revenue within the Group.

2.3.6.1 Insurance revenue

Insurance revenue not measured under the PAA

The Group's insurance revenue represents the provision of coverage and other services arising from a group of insurance contracts at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those services. Insurance revenue from a group of insurance contracts is therefore the relevant portion for the period of the total consideration for the contracts, [i.e., the amount of premiums paid to the Group adjusted for financing effect (the time value of money) and excluding any distinct investment components]. For contracts not measured under the PAA, the total consideration for a group of contracts covers amounts related to the provision of services and is comprised of:

- Insurance service expenses, excluding any amounts allocated to the loss component of the liability for remaining coverage
- The risk adjustment for non-financial risk, excluding any amounts allocated to the loss component of the liability for remaining coverage
- The CSM release
- Amounts related to insurance acquisition cash flows

Insurance revenue under the PAA

When applying the PAA, the Group recognises insurance revenue for the period based on the passage of time by allocating premium receipts including premium experience adjustments to each period of service. However, when the expected pattern of release from risk during the coverage period differs significantly from the passage of time, then premium receipts are allocated based on the expected pattern of incurred insurance service expense.

At the end of each reporting period, the Group considers whether there was a change in facts and circumstances indicating a need to change, on a prospective basis, the premium receipt allocation due to changes in the expected pattern of claim occurrence for new and existing groups.

2.3.6.1.1 Loss component

The Group has grouped contracts that are onerous at initial recognition separately from contracts in the same portfolio that are not onerous at initial recognition. Groups of insurance contracts that were not onerous at initial recognition can also subsequently become onerous if assumptions and experience change. The Group has established a loss component of the liability for remaining coverage for any onerous group depicting the future losses recognised.

A loss component represents a notional record of the losses attributable to each group of onerous insurance contracts (or contracts profitable at inception that have become onerous). The loss component is released based on a systematic allocation of the subsequent changes in the fulfilment cash flows to:

- (i) the loss component; and
- (ii) the liability for remaining coverage excluding the loss component.

The loss component is also updated for subsequent changes in estimates of the fulfilment cash flows related to future service. The systematic allocation of subsequent changes to the loss component results in the total amounts allocated to the loss component being equal to zero by the end of the coverage period of a group of contracts (since the loss component will have been materialised in the form of incurred claims). The Group uses the proportion on initial recognition to determine the systematic allocation of subsequent changes in future cash flows between the loss component and the liability for remaining coverage excluding the loss component.

2.3.6.1.2 Loss recovery component

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

When the Group recognises a loss component on initial recognition of an onerous group of underlying insurance contracts or when further onerous underlying insurance contracts are added to a group, the Company establishes a loss-recovery component of the assets for remaining coverage for a group of reinsurance contract held depicting the recovery of the losses.

Where a loss component has been set up subsequent to initial recognition of a group of underlying insurance contracts, the portion of income that has been recognized from related reinsurance contracts held is disclosed as a loss-recovery component.

Where a loss-recovery component has been set up at initial recognition or subsequently, the Company adjusts the loss-recovery component to reflect changes in the loss component of an onerous group of underlying insurance contracts.

The carrying amount of the loss-recovery component must not exceed the portion of the carrying amount of the loss component of the onerous group of underlying insurance contracts that the Company expects to recover from the group of reinsurance contracts held. On this basis, the loss-recovery component recognised at initial recognition is reduced to zero in line with reductions in the onerous group of underlying insurance contracts and is nil when loss component of the onerous group of underlying insurance contracts is nil.

2.3.6.2 Insurance finance income and expense

Insurance finance income or expenses comprise the change in the carrying amount of the group of insurance contracts arising from:

- The effect of the time value of money and changes in the time value of money
- The effect of financial risk and changes in financial risk

The Company systematically allocates expected total insurance finance income or expenses over the duration of the group of contracts to profit or loss or other comprehensive income as applicable using discount rates determined on initial recognition of the group of contracts.

In the event of transfer of a group of insurance contracts or derecognition of an insurance contract, the Company reclassifies the insurance finance income or expense to profit or loss as a reclassification adjustment to any remaining amounts for the group (or contract) that were previously recognised in other comprehensive income.

2.3.6.3 Income or expenses from reinsurance contracts held

The Group presents separately on the face of the statement of profit or loss and other comprehensive income the income or expenses from a group of reinsurance contracts held and reinsurance finance income or expenses. Income or expenses from reinsurance contracts held are split into the following two amounts:

- Amount recovered from reinsurers.
- An allocation of the reinsurance premiums paid.

The Group presents cash flows that are contingent on claims on the underlying contracts as part of the amount recovered from reinsurers. Ceding commissions that are not contingent on claims of the underlying contracts are presented as a deduction in the premiums to be paid to the reinsurer which is then allocated to profit or loss.

The Group establishes a loss recovery component of the asset for the remaining coverage for a group of reinsurance contracts held. This depicts the recovery of losses recognized on the initial recognition of an onerous group of underlying insurance contracts or on addition of onerous underlying insurance contracts to a group. The loss recovery component adjusts the CSM of the group of reinsurance contracts held. The loss recovery component is then adjusted to reflect:

- Changes in the fulfilment cash flows of the underlying insurance contracts that relate to future service and do not adjust the CSM of the respective groups to which the underlying insurance contracts belong to.
- Reversals of loss recovery component to the extent those reversals are not changes in the fulfilment cash flows of the group of reinsurance contracts held.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

- Allocations of the loss recovery component against the amounts recovered from reinsurers reported in line with the associated reinsured incurred claims or expenses.

2.3.6.4 Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Fees and commissions that are an integral part of the effective yield of the financial asset are recognised as an adjustment to the EIR of the instrument.

Investment income also includes dividends when the right to receive payment is established. Rental income arising from operating leases on investment properties is accounted for on a straight line basis over the lease terms.

2.3.6.5 Rendering of services and sales of goods

Revenue from sales of goods arising from property business engaged in by the Group. The revenue recognition is contingent on when control is transferred to buyer.

2.3.6.6 Finance income

Interest income arising from the micro-finance banking services offered by the Group and is recognized in the profit or loss as it accrues and is calculated by using the effective interest rate method.

2.3.7 Expenses recognition

2.3.7.1 Insurance service expenses

Insurance service expenses arising from a group of insurance contracts issued comprises:

- Changes in the LIC related to claims and expenses incurred in the period.
- Changes in the LIC related to claims and expenses incurred in prior periods (related to past service).
- Other directly attributable insurance service expenses incurred in the period.
- Amortization of insurance acquisition cash flows, which is recognized at the same amount in both insurance service expenses and insurance contract revenue.
- Loss component of onerous groups of contracts initially recognized in the period.
- Changes in the LRC related to future service that do not adjust the CSM, because they are changes in the loss components of onerous groups of contracts.

2.3.7.2 Other expenses

These are expenses other than insurance and investment related expenses. They include non-attributable employee benefits, professional fees, depreciation expenses and other non-operating expenses. Other expenses are accounted for on accrual basis and recognized in the statement of profit or loss upon utilization of the service or at the date of origination.

2.3.7.2 Finance costs

Interest expense arising from the micro-finance banking services offered by the Group is recognized in the profit or loss as it accrues and is calculated by using the effective interest rate method. Accrued interest is included within the carrying value of the interest-bearing financial liability.

2.3.8 Cash and short-term deposits

Cash and short-term deposits in the statement of financial position comprise cash at banks and on hand and short-term deposits with a maturity of three months or less from origination, which are subject to an insignificant risk of changes in value and not subject to any encumbrances.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts, if any, as they are considered an integral part of the Group's cash management.

2.3.9 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

2.3.9.1 Financial assets

2.3.9.1.1 Initial recognition

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Business Model Assessment

Business Model assessment involves determining whether financial assets are held to collect the contractual cashflows (rather than sell the instrument prior to its contractual maturity to realise its fair value changes).

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- Investment strategy for holding or selling the assets
- Past experience on how cash flows for these assets were collected.
- How the asset's performance is evaluated and reported to key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The business model for each portfolio of financial assets are to be categorized into one of the following models:

- Hold-to-collect contractual cash flows: Financial assets held with the sole objective to collect contractual cashflows;
- Hold-to-collect contractual cash flows and sell: Financial assets held with the objective to both collect contractual cashflows and sell;
- Fair value through profit or loss (FVTPL) business model: Financial assets held with neither of the objectives mentioned in the two categories above. They are basically financial assets held with the sole objective to trade and realize fair value changes.

Cash flow characteristics assessment

The assessment aims to identify whether the contractual cash flows are solely payments of principal and interest (SPPI) on the principal amount outstanding. The contractual cash flow characteristics assessment involves assessing the contractual features of an instrument to determine if they give rise to cash flows that are consistent with a basic lending arrangement.

The SPPI test is based on the premise that it is only when the variability in the contractual cash flows arises to maintain the holder's return in line with a 'basic lending arrangement' that the application of the effective interest method provides useful information.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset due to repayments. Thus the principal is not the legal amount due under the contractual terms of an instrument. This definition allows assets acquired at a discount or premium pass the SPPI test.

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at fair value through profit or loss (FVTPL).

2.3.9.1.2 Financial assets subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Group's financial assets at amortised cost includes short-terms deposits with banks, Loans and advances, and other Debt instruments at amortised cost if both of the following conditions are met

- The instruments are held within a business model with the objective of holding the instrument to collect the contractual cash flows
- The contractual terms of the debt instrument give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding

Financial assets designated at fair value through OCI (equity instruments)

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under IAS 32 *Financial Instruments: Presentation* and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Group elected to classify irrevocably its non-listed equity investments under this category.

Financial assets at fair value through profit or loss

Financial assets in this category are those that are managed in a fair value business model, or that have been designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. This category includes debt instruments whose cash flow characteristics fail the SPPI criterion or are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

This category includes listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognised as investment income in the statement of profit or loss when the right of payment has been established.

2.3.9.1.3 Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired Or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

2.3.9.1.4 Impairment of financial assets

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables, the Group applies a regulatory no premium no covers impairment approach.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

2.3.9.1.5 The calculation of ECLs

The Group calculates ECLs based on scenarios to measure the expected cash shortfalls, discounted at an appropriate EIR. A cash shortfall is the difference between the cash flows that are due to the Group in accordance with the contract and the cash flows that the entity expects to receive.

When estimating the ECLs the Group considers three scenarios (a base case, an upside, and a downside). When relevant, the assessment of multiple scenarios also incorporates the probability that the defaulted loans will cure.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

PD - The Probability of Default is an estimate of the likelihood of default over a given time horizon. It is estimated with consideration of economic scenarios and forward-looking information.

EAD - The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, and accrued interest from missed payments.

LGD - The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the Company would expect to receive. It is usually expressed as a percentage of the EAD.

The Group allocates its assets subject to ELC calculations into one of these categories, determined as follows:

Stage 1 (12mECL): The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within 12 months after the reporting date. The Company calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an appropriate EIR. This calculation is made for each of the three scenarios, as explained above.

Stage 2 (LTECL): When an instrument has shown a significant increase in credit risk since origination, the Company records an allowance for the LTECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected losses are discounted by an appropriate EIR.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Stage 3/Impairment (LTECL): For debt instruments considered credit-impaired, the Company recognises the lifetime expected credit losses for these instruments. The method is similar to that for Stage 2 assets, with the PD set at 100%.

2.3.9.1.6 Write-offs

Financial assets are written off either partially or in their entirety only when the Group has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense. There were no write-offs over the periods reported in these financial statements

2.3.9.2 Financial liabilities

2.3.9.2.1 Initial recognition and measurement

Financial liabilities are classified at initial recognition, as borrowing, payables and other payables as appropriate.

All financial liabilities are recognized initially at fair value. The Group's financial liabilities include trade payables, other accrual and payables.

2.3.9.2.2 Subsequent measurement

Subsequent measurement of financial liabilities depends on their classification.

i. Payables and other payables

Subsequent to initial recognition, they are measured at amortized cost using the effective interest rate method. If the due date of the liability is less than one-year discounting is omitted.

ii. Interest bearing loans and borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in finance cost in the statement of profit or loss.

2.3.9.2.3 Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the profit or loss.

2.3.9.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.3.10 Deposit liabilities

Deposits liabilities include current, term and savings deposits with the Group by depositors. Deposits from customers are initially recognized in liabilities at fair value less transaction cost and subsequently measured at amortised cost.

Interest paid on the deposits is expensed as finance cost in profit or loss' during the period in which the Group has the obligation to pay the interest. Deposits are derecognised when repaid to customers on demand or used to offset amount(s) due from the customer as agreed in the contract.

2.3.11 Fair value measurement

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The Group measures financial instruments and non-financial assets such as investment properties at fair value at each reporting date. Also, fair values of financial instruments measured at amortised cost are disclosed in Note 3.5.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each year.

The Group's management determines the policies and procedures for both recurring fair value measurement, such as investment properties and unquoted equity instruments, and for non-recurring measurement, such as assets held for distribution in discontinued operation.

External valuers are involved for valuation of significant assets, such as investment properties. Involvement of external valuers is decided upon annually by the management after discussion with and approval by the audit committee. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. The management, in conjunction with the Group's external valuers, also compares the changes in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The fair value of financial instruments that are actively traded in organised financial markets is determined by reference to quoted market bid prices for assets and offer prices for liabilities, at the close of business on the reporting date, without any deduction for transaction costs.

For units in unit trusts and shares in open ended investment companies, fair value is determined by reference to published bid values in an active market.

For other financial instruments not traded in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include the discounted cash flow method, comparison to similar instruments for which market observable prices exist and other relevant valuation models.

Their fair value is determined using a valuation model that has been tested against prices or inputs to actual market transactions and using the Group's best estimate of the most appropriate model assumptions.

For discounted cash flow techniques, estimated future cash flows are based on management's best estimates and the discount rate used is a market-related rate for a similar instrument. The use of different pricing models and assumptions could produce materially different estimates of fair values.

The fair value of floating rate and overnight deposits with credit institutions is their carrying value. The carrying value is the cost of the deposit and accrued interest. The fair value of fixed interest-bearing deposits is estimated using discounted cash flow techniques. Expected cash flows are discounted at current market rates for similar instruments at the reporting date.

2.3.12 Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Group of assets.

Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

Impairment losses of continuing operations are recognized in the profit or loss in those expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of the asset's or CGU's recoverable amount.

A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the profit or loss unless the asset is carried at revalued amount, in which case, the reversal is treated as a revaluation increase.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Intangible assets

Intangible assets with indefinite useful lives are tested for impairment annually at 31 December, either individually or at the cash generating unit level, as appropriate and when circumstances indicate that the carrying value may be impaired.

2.3.13 Pledged assets

Financial assets transferred to external parties that do not qualify for de-recognition are reclassified in the statement of financial position from financial assets to pledged assets, if the transferee has received the right to sell or re-pledge them in the event of default from agreed terms.

Initial recognition of pledged assets is at fair value, whilst subsequent measurement is based on the classification and measurement of the financial asset in accordance with IFRS 9.

2.3.14 Trade receivables

Trade receivables (premium receivable) are initially recognized at fair value and subsequently measured at amortized cost less provision for impairment. Discounting is omitted where the effect of discounting is immaterial.

An allowance for impairment is made when there is objective evidence such as the probability of solvency or significant financial difficulties of the debtors that the Group will not be able to collect the amount due under the original terms of the invoice. Impaired debts are derecognized when they are assessed as uncollectible.

If in a subsequent period the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previous recognized impairment loss is reversed to the extent that the carrying value of the asset does not exceed its amortised cost at the reversed date. Any subsequent reversal of an impairment loss is recognized in the profit or loss.

2.3.15 Other receivables and prepayment

Other receivables are made up of prepayments and other amounts due from parties which are not directly linked to insurance or investment contracts. Except prepayment and other receivables that are not financial assets, these are measured at amortised costs. Discounting is omitted where the effect of discounting is immaterial.

2.3.16 Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

If any, the Group's lease liabilities are included in Interest-bearing loans and borrowings.

iii) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of **buildings and space** (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of **buildings** that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.3.17 Investment properties

Investment properties held for rental income and capital appreciation are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the profit or loss in the year in which they arise.

Fair values are evaluated annually by an accredited external, independent valuer, applying a valuation model.

Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the profit or loss in the year of retirement or disposal.

Transfers are made to or from investment property only when there is a change in use evidenced by the end of owner-occupation, commencement of an operating lease to another party or completion of construction or development. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property and equipment up to the date of the change in use.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

2.3.18 Investments in subsidiaries

Investments in subsidiaries are carried in the separate statement of financial position at cost less allowance for impairment losses. Where, there has been impairment in the value of investments in subsidiaries, the loss is recognised as an expense in the period in which the impairment is identified. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss account.

2.3.19 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the profit or loss in the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period (five years) and the amortisation method (straight line) for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the profit or loss in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash generating unit level. Such intangibles are not amortised. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the profit or loss when the asset is derecognized.

2.3.20 Property and equipment

Property and equipment are measured on initial recognition at cost. Subsequently (except for building) they are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment losses. Replacement or major inspection costs are capitalized when incurred and if it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably.

Land and building are measured at revalued amount less accumulated depreciation and impairment losses recognised after the date of the revaluation. Valuations are performed at least once in every 5 years or when a major improvement is carried out to ensure that the fair value of a revalued asset does not differ materially from its carrying amount.

Any revaluation surplus is recorded in other comprehensive income and hence, credited to the asset revaluation reserve in equity, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in the profit or loss, in which case, the increase is recognised in the profit or loss. A revaluation deficit is recognized in the profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in the asset revaluation reserve.

Accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Depreciation on property, plant and equipment is calculated using the straight-line method to allocate the cost less the residual values over the estimated useful lives as follows;

Land	Not depreciated
Building	2%
Leasehold improvements	20%
Plant and machinery	20%
Motor vehicles	25%
Furniture and fittings and equipment	20%

The assets' residual values, and useful lives and method of depreciation are reviewed and adjusted, if appropriate, at each financial year end and adjusted prospectively, if appropriate.

Impairment reviews are performed when there are indicators that the carrying value may not be recoverable. Impairment losses are recognised in the profit or loss as an expense.

An item of property and equipment is derecognized upon disposal or when no further future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss in the year the asset is derecognized.

2.3.21 Statutory deposit

Statutory deposit represents fixed deposit with the Central Bank of Nigeria in accordance with section 10(3) of the Insurance Act, 2003. The deposit is recognised at cost in the statement of financial position being 10% of the statutory minimum capital requirement of ₦3 billion for General insurance business and of ₦2 billion for life business. Interest income on the deposit is recognised in the statement of profit or loss in the period the interest is earned.

2.3.22 Deposit for shares

Deposit for shares are amounts that the Company has placed with (asset) or received from subsidiary, associate or another company (liability) for the ultimate purpose of equity investment in the relevant company for which relevant regulatory formalities have not been completed at the reporting date. Deposits for shares are carried at cost less accumulated impairment losses, if any.

2.3.23 Insurance contracts

2.3.23.1 Key types of insurance contracts issued, and reinsurance contracts held

IFRS 17 replaces IFRS 4 Insurance Contracts and is effective for annual periods beginning on or after 1 January 2024. The Group issues the following types of contracts that are accounted for in accordance with IFRS 17 Insurance Contracts:

- (i) Life insurance
- (ii) Non-life insurance
- (iii) Reinsurance contracts held

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

2.3.23.1.1 Life insurance

For the Life insurance products, the Group offers the following insurance contracts with indication of IFRS 17 methodologies applied on these contracts:

(a) Individual Life With-profit Policies - These are endowment plans without participating features.

The Group accounts for these policies applying the General Measurement Model (GMM).

(b) Individual Life Without-profit Policies including:

(i) Term life insurance contracts providing level or decreasing sum assured coverage for a limited period in exchange for renewable fixed premiums. The Group accounts for these policies applying the GMM.

(ii) Whole life assurance contracts. The Group accounts for these policies applying the GMM.

(iii) Term life insurance contracts with contract boundaries of one year or less. The Group accounts for these policies applying the Premium Allocation Approach (PAA).

(c) Annuity Policies including:

- Fixed annuity contracts providing the annuitant with a guaranteed income payout for a limited period.
- Deferred annuity contracts providing the annuitant with a guaranteed income payout for life, with the first payment due at the end of the deferment period, provided all contractual premiums were paid. The policyholder is entitled to a surrender benefit (a portion of the accumulation balance at a guaranteed interest rate) if premiums are not fully paid.

The Group accounts for these policies applying the GMM.

(d) Life Business – Deposit based policies.

These contracts are individual term assurance plans providing a death benefit with non-distinct investment components.

The Group accounts for these policies applying the GMM.

(e) Group Life Insurance - The Group issues term assurance plans providing death benefits to employees of businesses with coverage of one year or less.

The Group accounts for these contracts applying the PAA.

(f) Health Business: these are plans covering the medical expenses of the policyholders with a duration of one year or less.

The Group accounts for these contracts applying the PAA.

2.3.23.1.2 Non-life insurance

The Group issues non-life insurance to individuals and businesses. Non-life insurance products offered include:

- (i) products with a coverage period of one year or less: these typically include motor, property, marine, fire, general accident, aviation and oil & gas. These products offer protection of policyholder's assets and indemnification of other parties that have suffered damage as a result of a policyholder's accident.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The Group accounts for these contracts applying the PAA.

- (ii) products with a coverage period of over one year: these typically include engineering and bond. These products offer protection of policyholder's assets and indemnification of other parties that have suffered damage as a result of a policyholder's accident.

The Group accounts for these contracts applying the GMM.

2.3.23.1.3 Reinsurance contracts held

The Group also holds the following types of reinsurance contracts to mitigate risk exposure.

- For the life business, the Group holds quota share reinsurance treaties and accounts for these treaties applying the PAA.
- For non-life, the Group holds facultative (excess of individual loss) reinsurance policies and quota share reinsurance contracts accounted for applying the PAA.

2.3.23.2 Insurance and reinsurance contracts definition and classification

The definition of an insurance contract refers to 'insurance risk' which is defined as 'risk, other than financial risk, transferred from the holder of a contract to the issuer'.

Mutual Benefit issues insurance contracts in the normal course of business, under which it accepts significant insurance risk from its policyholders. As a general guideline, the Group determines whether it has significant insurance risk, by comparing benefits payable after an insured event with benefits payable if the insured event had not occurred. Insurance contracts can also transfer financial risk.

The Group does not issue any contracts with direct participating features.

2.3.23.3 Insurance and reinsurance contracts accounting treatment

2.3.23.3.1 Separating components from insurance and reinsurance contracts

IFRS 17 requires the Group to identify and separate components in certain circumstances. Such component may be an embedded derivative, an investment component, or a component for services other than insurance contract.

Embedded derivatives are not separated for accounting purposes if the non-derivative host is a financial asset within the scope of IFRS 9 i.e., the classification criteria of IFRS 9 are applied to the financial asset as a whole, otherwise, an embedded derivative will be separated from the host contract if and only if, all criteria below are met:

- a. The economic characteristics and risks of the embedded derivatives are not closely related to the economic characteristics and risks of the host;
- b. A separate instrument with the same terms as embedded derivative would meet the definition of a derivative; and
- c. The hybrid contract is not measured at fair value with changes in fair value recognized in profit or loss.

An investment component is distinct if and only if, both of the following conditions are met:

- (i) The investment component and the insurance components are not highly interrelated
- (ii) contract with equivalent terms is sold, or could be sold, separately in the same market or the same jurisdiction, either by entities that issue insurance contracts or by other parties.

An investment component and an insurance component are highly interrelated if and only if; the Group is unable to measure one component without considering the other or the policyholder is unable to benefit from one component unless the other is also present, for example the lapse and maturity of one component causes the lapse or maturity of the other.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The Group assesses its insurance products to determine whether they contain distinct components which must be accounted for under another IFRS rather than IFRS 17. After separating any distinct components, the Group apply IFRS 17 to all remaining components of the (host) insurance contract.

The deposit-based life endowment contracts issued by the Group include a surrender option under which the surrender value is paid to the policyholder on maturity or earlier lapse of the contract. These surrender options have been assessed to meet the definition of a non-distinct investment component in IFRS 17. IFRS 17 defines investment components as the amounts that an insurance contract requires an insurer to repay to a policyholder even if an insured event does not occur. Investment components which are highly interrelated with the insurance contract of which they form a part are considered non-distinct and are accounted for under IFRS 17 but excluded from the insurance service result (i.e., they are not accounted for as either insurance revenue or insurance service expenses). The surrender options are considered non-distinct investment components as the Group is unable to measure the value of the surrender option component separately from the life insurance portion of the contract.

The Group has also assessed that some of its life contracts have distinct investment components. The Group is able to measure the value of the surrender option component separately from the life insurance portion of the contract. Also, similar contracts with equivalent terms are observed to be sold separately by other insurance companies and financial institutions in Nigeria. The Group accounts for the distinct investment component under IFRS 9 (as indicated in section 2.3.24 on investment contract liabilities) and the risk component under IFRS 17.

2.3.23.3.2 Level of aggregation

IFRS 17 defines the level of aggregation to be used for measuring insurance contracts and their related profitability. This is a key issue in identifying onerous contracts and in determining the recognition of profit or loss and presentation in the financial statements. The starting point for aggregating contracts is to identify portfolios of insurance contracts. A portfolio comprises contracts that are subject to similar risks and managed together.

IFRS 17 requires an entity to determine the level of aggregation for applying its requirements. The level of aggregation for the Group is determined firstly by dividing the business written into portfolios.

Portfolios comprise groups of contracts with similar risks which are managed together. Portfolios are further divided based on expected profitability at inception into three categories: onerous contracts, contracts with no significant risk of becoming onerous, and the remainder.

This means that, for determining the level of aggregation, the Group identifies a contract as the smallest 'unit' i.e., the lowest common denominator. However, the Group makes an evaluation of whether a series of contracts can be treated together in making the profitability assessment based on reasonable and supportable information, or whether a single contract contains components that need to be separated and treated as if they were stand-alone contracts. As such, what is treated as a contract for accounting purposes may differ from what is considered as a contract for other purposes (i.e., legal or management). IFRS 17 also notes that no group for level of aggregation purposes may contain contracts issued more than one year apart. The Group has defined portfolios of insurance contracts based on its product lines, namely Individual savings and pension plan, mutual education guarantee plan, keyman assurance, mortgage protection, group life assurance, term assurance, endowment assurance, insurvisa policy, directors' liability, micro personal investment contracts due to the fact that the products are subject to similar risks and managed together. The portfolios are further divided by year of issue and profitability for recognition and measurement purposes. The expected profitability of these portfolios at inception is determined based on the existing actuarial valuation models which take into consideration existing and new business. Hence, within each year of issue, portfolios of contracts are divided into three groups, as follows:

- A group of contracts that are onerous at initial recognition
- A group of contracts that at initial recognition have no significant possibility of becoming onerous subsequently
- A group of the remaining contracts in the portfolio

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The reinsurance contracts held portfolios are further divided into:

- A group of contracts on which there is a net gain on initial recognition
- A group of contracts that have no significant possibility of a net gain arising subsequent to initial recognition
- A group of the remaining contracts in the portfolio

The Group has elected to include in the same group, contracts where its ability to set prices or levels of benefits for policyholders with different characteristics is constrained by regulation. Currently, there is no law or regulation that constrains the Group's practical ability to set a different price or level of benefits for policyholder with different characteristics.

IFRS 17 also requires that contracts are grouped based on the Group's expectations of profitability at contract inception. The Group has concluded that all contracts measured using premium allocation approach (PAA) as non-onerous contracts, will be classified as having a significant possibility of becoming onerous subsequently, i.e., classified into a group of the type specified in IFRS 17 as a group of the remaining contracts in the portfolio. This means that the Group will allocate PAA contracts for each portfolio-cohort combination into groups of contracts that are onerous at initial recognition and groups of the remaining contracts in the portfolio. This is due to the inherent volatility of performance expected on individual insurance contracts (e.g., impact of large claims and claim inflation on short term contracts) in the Group jurisdictional market as well as the fact that charging premiums such that there is no significant possibility of losses would not be considered competitive.

For contracts measured under the PAA, the Group assume that no contracts in a portfolio of insurance contracts are onerous at initial recognition unless facts and circumstances indicate otherwise and there has been an approval through an official process to implement commercial actions which include promotional discounts on premium rates, selling loss leaders to gain market shares or no claims discount on renewal of policies, which could result into a group of contracts being onerous.

For subsequent measurement, the onerous contract assessment is only required if facts and circumstances indicate that a group of contracts is onerous. Possible reasons/indicators of onerous contracts include:

- Unfavorable combined ratio exceeding 100%.
- Relevant market-wide based information indicating that the portfolio of business is unprofitable
- Unfavorable experience trends
- Unfavorable changes in external conditions
- Any other changes that affect the marketability and/or claim experience of the portfolio.

2.3.23.2.3 Contract boundary

A contract is an arrangement that binds one or both of the parties involved. If both parties are bound equally, the boundary of the contract is generally clear. Similarly, if neither party is bound, it is clear that no genuine contract exists. Thus:

- The outer limit of the existing contract is the point at which the entity is no longer required to provide coverage and the policyholder has no right of renewal. Beyond that outer limit, neither party is bound.
- The Group is no longer bound by the existing contract at the point at which the contract confers on the Group the practical ability to reassess the risk presented by a policyholder and, as a result, the right to set a price that fully reflects that risk.

The measurement of a group of insurance contracts includes all the cash flows expected to result from the contracts in the group, reflecting estimates of policyholder behavior. Thus, to identify the future cash flows that will arise as the entity fulfils its obligations, it is necessary to determine the contract boundary that distinguishes whether future premiums, and the resulting benefits and claims, arise from:

- Existing insurance contracts. If so, those future premiums, and the resulting benefits and claims, are included in the measurement of the group of insurance contracts

Or

- Future insurance contracts. If so, those future premiums, and the resulting benefits and claims, are not included

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

in the measurement of the group of existing insurance contracts

As such, the Group does not recognize a liability or asset relating to expected premiums or expected claims outside the boundary as such amounts relates to future insurance contracts. However, the Group recognizes an asset for acquisition cash flows paid before the related group of insurance contracts is recognized.

The Group includes in the measurement of a group of insurance contracts all the future cash flows within the boundary of each contract in the group. Cash flows are within the boundary of an insurance contract if they arise from substantive rights and obligations that exist during the reporting period in which the Group can compel the policyholder to pay the premiums, or in which the Group has a substantive obligation to provide the policyholder with insurance contract services. A substantive obligation to provide insurance contract services ends when:

- The Group has the practical ability to reassess the risks of the particular policyholder and, as a result, can set a price or level of benefits that fully reflects those risks

Or

Both of the following criteria are satisfied:

- The Group has the practical ability to reassess the risks of the portfolio of insurance contracts that contain the contract and, as a result, can set a price or level of benefits that fully reflects the risk of that portfolio
- The pricing of the premiums up to the date when the risks are reassessed does not take into account the risks that relate to periods after the reassessment date.

A liability or asset relating to expected premiums or claims outside the boundary of the insurance contract is not recognized. Such amounts relate to future insurance contracts.

The Group has set contract boundaries based on the end of the policy terms.

For contracts with renewal periods, the Group assesses whether premiums and related cash flows that arise from the renewed contract are within the contract boundary. The pricing of the renewals is established by the Group by considering all the risks covered for the policyholder by the Group, when underwriting equivalent contracts on the renewal dates for the remaining coverage. The Group reassess contract boundary of each group at the end of each reporting period.

2.3.23.3 Recognition

2.3.23.3.1 Initial recognition for insurance contracts issued

The Group recognises groups of insurance contracts that it issues from the earliest of the following:

- The beginning of the coverage period of the group of contracts,
- The date when the first payment from a policyholder in the group is due, or when the first payment is received if there is no due date
- For a group of onerous contracts, as soon as facts and circumstances indicate that the group is onerous

2.3.23.3.2 Initial recognition for reinsurance contracts held

The Group recognises a group of reinsurance contracts held, for which it has entered, from the earliest of the following:

- The beginning of the coverage period of the group of reinsurance contracts held. However, the Group delays the recognition of a group of reinsurance contracts held that provide proportionate coverage until the date when any underlying insurance contract is initially recognised, if that date is later than the beginning of the coverage period of the group of reinsurance held.
- The date the Group recognises an onerous group of underlying insurance contracts if the Group entered into the related reinsurance contract held in the group of reinsurance contracts held at or before that date

The reinsurance contracts held by the Group provide proportionate cover. Therefore, the Group does not recognize a proportional reinsurance contract held until at least one underlying direct insurance contract has been recognized. Groups of reinsurance contracts held are recognized when the coverage of the first underlying contract starts. The Group adds

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

new contracts to the group when they are issued or initiated.

The issue date of a contract is when an entity has a contractual obligation to accept risk. The issue date is typically before the beginning of coverage and due date for the initial premium. However, the Group only recognises issued insurance contracts before these dates if facts and circumstances indicate that the contracts in the group to which the PAA applies are onerous.

The recognition requirements for reinsurance contracts held that provide proportionate coverage are intended to simplify recognition for proportionate reinsurance contracts held. Circumstances in which the first underlying attaching contract is issued, shortly after the reinsurance contracts are written, will result in similar timing of recognition for proportionate and 'other-than-proportionate' reinsurance contracts. In other cases, there may be a greater difference in the timing of recognition.

If there is no contractual due date, the first payment from the policyholder is deemed to be due when it is received. The Group determines whether any contracts form a group of onerous contracts before the earlier of the first two dates above (i.e., before the earlier of the beginning of the coverage period and the date when the first payment from a policyholder in the group is due) if facts and circumstances indicate there is such a group.

2.3.23.3 Initial recognition of insurance acquisition cash flows

Insurance acquisition cash flows are cash flows arising from the costs of selling, underwriting and starting a group of insurance contracts that are directly attributable to the portfolio of insurance contracts to which the group belongs. Such cash flows include cash flows that are not directly attributable to individual contracts or groups of insurance contracts within the portfolio.

The Group has aggregated its directly attributable expenses into the following classes including administrative expense, claims processing and payment, corporate service expense, finance charges, legal and directors expenses, personnel costs (staff salaries in claims, staff training and development and related cost) , agency cost and related expenses, fixed and variable overheads incurred directly attributable to cost centers (e.g. salaries for IT staff, repairs and maintenance), business development and Commission.

The Group recognises an asset for insurance acquisition cash flows paid (or insurance acquisition cash flows for which a liability has been recognised under another IFRS standard) before the related group of insurance contracts is recognised, unless it elects to expense those acquisition cash flows as incurred for premium allocation approach (PAA) contracts. The Group recognise such an asset for each related group of insurance contracts and allocates insurance acquisition cash flows to an existing or future group of insurance contracts using a systematic and rational method.

Any insurance acquisition cash flow paid at the date of initial recognition of the group of insurance contracts are recognised as part of the contractual service margin of the group of insurance contracts. Any insurance acquisition cash flows the Group expects to pay after the related group of insurance contracts is recognised as part of the fulfilment cash flows of the group of insurance contracts.

The systematic and rational method of allocating insurance acquisition cash flows to groups of contracts shall be used to allocate;

- Insurance acquisition cash flows that are directly attributable to a group of insurance contracts:
 - To that group; and
 - To groups that will include insurance contracts that are expected to arise from renewals of the insurance contracts in that group
- Insurance acquisition cash flows directly attributable to a portfolio of insurance contracts that are not directly attributable to individual contracts or groups of contracts to groups in the portfolio.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

2.3.23.3.4 Initial recognition of investment contracts with discretionary participation features

The date of initial recognition of an investment contract with discretionary participation features is the date that the entity becomes party to the contract. This is consistent with the requirements for recognition of a financial instrument in IFRS 9 and is likely to be earlier than the date of initial recognition for an insurance contract. Currently the Group does not issue investment contracts with discretionary participation features.

2.3.23.3.5 Onerous groups of contracts

The Group issues some contracts before the coverage period starts and the first premium becomes due. Therefore, the Group has determined whether any contracts issued form a group of onerous contracts before the earlier of the beginning of the coverage period and the date when the first payment from a policyholder in the group is due. The Group looks at facts and circumstances to identify if a group of contracts are onerous based on:

- Historical loss ratios
- Relevant risk factors such as age, gender, occupation, geographical location and the size of the sum assured
- Environmental factors such as a change in market experience or regulations

For groups of contracts measured using the premium allocation approach (PAA), the Group assumes all groups of insurance contracts to be non-onerous unless the Board has approved the sales of loss-making contracts through an official process. The Group will assess the probability of non-onerous contracts becoming onerous in the future base on expert judgement of the projected combined ratio.

For subsequent measurement, the Group use combined ratio as facts and circumstances hence, a group of contracts will be deemed onerous if there has been a combined ratio of over 100% in two (2) subsequent annual reporting periods.

2.3.23.4 Measurement of insurance contracts

2.3.23.4.1 General Measurement Model (GMM)

2.3.23.4.1.1 Insurance contract – Initial Measurement

The general model measures a group of insurance contracts as the sum of the following components, or ‘building blocks’, for each group of insurance contracts:

Fulfilment cash flows, which comprise:

- Estimates of expected future cash flows over the life of the contract
- An adjustment to reflect the time value of money and the financial risks related to the future cash flows to the extent that the financial risks are not included in the estimates of the future cash flows
- A risk adjustment for non-financial risk

A contractual service margin representing unearned profit an entity will recognise as it provides service under the insurance contracts in the group.

Fulfilment Cashflows (FCF)

Fulfilment cash flows comprise unbiased and probability-weighted estimates of future cash flows, discounted to present value to reflect the time value of money and financial risks, plus a risk adjustment for non-financial risk.

The Group’s objective in estimating future cash flows is to determine the expected value, or the probability-weighted mean, of the full range of possible outcomes, considering all reasonable and supportable information available at the reporting date without undue cost or effort. The Group estimates future cash flows considering a range of scenarios which have commercial substance and give a good representation of possible outcomes. The cash flows from each scenario are probability-weighted and discounted using current assumptions.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

When estimating future cash flows, the Group includes all cash flows that are within the contract boundary including:

- Premiums and related cash flows
- Claims and benefits, including reported claims not yet paid, incurred claims not yet reported and expected future claims
- Payments to policyholders resulting from embedded surrender value options
- An allocation of insurance acquisition cash flows attributable to the portfolio to which the contract belongs
- Claims handling costs
- Policy administration and maintenance costs, including recurring commissions that are expected to be paid to intermediaries
- Transaction-based taxes including; premium taxes, value added taxes
- Payments by the Group in a fiduciary capacity to meet tax obligations incurred by policyholder
- Allocation of fixed and variable overheads directly attributable to fulfilling insurance contracts
- Cost that the Group incurs in providing investment- related services for investment contracts without direct participation features
- Any other costs specifically chargeable to the policyholder under the term of the contract

The Group incorporates, in an unbiased way, all reasonable and supportable information available without undue cost or effort about the amount, timing and uncertainty of those future cash flows. The Group estimates the probabilities and amounts of future payments under existing contracts based on information obtained, including:

- Information about claims already reported by policyholders
- Other information about the known or estimated characteristics of the insurance contracts
- Historical data about the Group's own experience, supplemented when necessary with data from other sources. Historical data is adjusted to reflect current conditions
- Current pricing information, when available

The measurement of fulfilment cash flows-includes insurance acquisition cash flows which are allocated based on rational and systematic manner as prescribed in section **2.3.23.3.3** above.

Discount Rate

The time value of money and financial risk is measured separately from expected future cash flows with changes in financial risks recognized in profit or loss at the end of each reporting period unless the Group has elected the accounting policy to present the time value of money separately in profit or loss and other comprehensive income. The Group measures the time value of money using discount rates that reflect the liquidity characteristics of the insurance contracts and the characteristics of the cash flows, consistent with observable current market prices. They exclude the effect of factors that influence such observable market prices but do not affect the future cash flows of the insurance contracts (e.g., credit risk).

In determining discount rates for cash flows, the Group uses the 'bottom-up approach' to estimate discount rates starting from a risk-free rate with similar characteristics, plus an illiquidity premium where applicable. Risk free rates are determined by reference to the yields of highly liquid FGN Bonds. The illiquidity premium is determined by reference to observable market rates, including sovereign debt, corporate debt and market swap rates.

Risk adjustment for non-financial risk

The Group measures the compensation it would require for bearing the uncertainty about the amount and timing of cash flows arising from insurance contracts, other than financial risk, separately as an adjustment for non-financial risk.

The Group adopts the Value at Risk (Confidence level) approach in estimating the risk adjustment. For the long-term individual life business measured under GMM, the risk adjustment is estimated using the Provision for Adverse deviation (PAD). The approach is based on South African Solvency Assessment and Management (SAM) framework and entails stressing the various non-financial assumptions underlying the best estimate cashflows by SAM IFRS 17 shock factors. The SAM IFRS 17 Shock factors adopted are in respect of non-financial risk only and represents a 97% confidence level.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The Group uses the VAR Mack Method to measure risk adjustment for life contracts / portfolios measured under the PAA. Risk adjustment under the Mack Method is derived as the difference between the claims reserve computed under the log-normally distributed estimate at a selected percentile and the chain ladder reserve. This provides an aggregated risk adjustment amount, which is then allocated across IFRS 17 groups of contracts using an allocation model.

For its non-life business, the Group uses a Value at Risk approach to calibrate the size of the risk adjustment per class and convert this to a factor (or percentage) which is applied to the present value of future cashflows for each class. The Group adopted a 75% confidence level for the risk adjustment determination.

Expense allocation

IFRS 17 requires that costs which do not relate to the fulfilment of contracts be excluded in the estimation of fulfilment cashflows. It further requires that overhead costs are allocated to group of contracts using methods that are systematic and rational and are consistently applied to all costs that have similar characteristics.

The Group has adopted an expense allocation policy which splits the Group's expenses into attributable and non-attributable expenses.

Contractual Service Margin (CSM)

The Group's CSM is a component of the asset or liability for the group of insurance contracts that represents the unearned profit the Group will recognise as it provides services in the future. The Group measures the CSM on initial recognition at an amount that, unless the group of contracts is onerous, results in no income or expenses arising from:

- Initial recognition of the fulfilment cash flows
- Derecognition at the date of initial recognition of any asset or liability recognised for insurance acquisition cash flows
- Any cash flows arising from the contracts in the group at that date

For groups of contracts assessed as onerous, the Group has recognised a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the fulfilment cash flows and the CSM of the group being zero. A loss component has been established by the Group for the liability for remaining coverage for an onerous group depicting the losses recognized for additional disclosures on the loss component.

The liability for remaining coverage is the Group's obligation to investigate and pay valid claims for insured events that have not yet occurred (i.e., the obligation that relates to the unexpired portion of the coverage period) and at initial recognition, comprises all remaining expected future cash inflows and cash outflows under an insurance contract plus the CSM for that contract.

The liability for incurred claims is the Group's obligation to investigate and pay valid claims for insured events that have already occurred, including events that have occurred but for which claims have not been reported, and other incurred insurance expenses. At initial recognition of a group of contracts, the liability for incurred claims is usually nil as no insured events have occurred.

Deferred acquisition costs (DAC)

Under IFRS 4, the Group recognised deferred acquisition cash flows separately as assets. Under IFRS 17, insurance acquisition cash flows are allocated to existing and future groups of insurance contracts on a systematic and rational basis. For insurance contracts measured under the GMM, on initial recognition of a group of contracts, the allocated insurance acquisition cash flows decrease the CSM and are thus implicitly deferred within the CSM, leading to a lower amount of CSM amortisation recognised in revenue in future reporting periods as services are rendered. However, for presentation purposes, directly attributable acquisition costs allocated to a group of contracts are amortised as an insurance service expense in a systematic way on the basis of the passage of time, with an equal amount recognised as insurance revenue.

Under the PAA, the Group recognised insurance acquisition cash flows in the liability for remaining coverage (LRC)

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

and amortised insurance acquisition cash flows as insurance service expenses.

2.3.23.4.1.2. Insurance contracts – subsequent measurement

The CSM at the end of the reporting period represents the profit in the group of insurance contracts that has not yet been recognised in profit or loss, because it relates to future service to be provided.

For a group of insurance contracts, the carrying amount of the CSM of the group at the end of the reporting period equals the carrying amount at the beginning of the reporting period adjusted, as follows:

- The effect of any new contracts added to the group
- Interest accreted on the carrying amount of the CSM during the reporting period, measured at the discount rates at initial recognition
- The changes in fulfilment cash flows relating to future service, except to the extent that:
 - Such increases in the fulfilment cash flows exceed the carrying amount of the CSM, giving rise to a lossOR
 - Such decreases in the fulfilment cash flows are allocated to the loss component of the liability for remaining coverage
- The effect of any currency exchange differences on the CSM
- The amount recognised as insurance revenue because of the transfer of services in the period, determined by the allocation of the CSM remaining at the end of the reporting period (before any allocation) over the current and remaining coverage period

The locked-in discount rate is the weighted average of the rates applicable at the date of initial recognition of contracts that joined a group over a 12-month period. The discount rate used for accretion of interest on the CSM is determined using the bottom-up approach at inception.

The changes in fulfilment cash flows relating to future service that adjust the CSM comprise of:

- Experience adjustments that arise from the difference between the premium receipts (and any related cash flows such as insurance acquisition cash flows and insurance premium taxes) and the estimate, at the beginning of the period, of the amounts expected. Differences related to premiums received (or due) related to current or past services are recognised immediately in profit or loss while differences related to premiums received (or due) for future services are adjusted against the CSM
- Changes in estimates of the present value of future cash flows in the liability for remaining coverage, except those relating to the time value of money and changes in financial risk (recognised in the statement of profit or loss and other comprehensive income rather than adjusting the CSM)
- Differences between any investment component expected to become payable in the period and the actual investment component that becomes payable in the period. Those differences are determined by comparing (i) the actual investment component that becomes payable in the period with (ii) the payment in the period that was expected at the start of the period plus any insurance finance income or expenses related to that expected payment before it becomes payable.
- Changes in the risk adjustment for non-financial risk that relate to future service

Except for changes in the risk adjustment, adjustments to the CSM noted above are measured at discount rates that reflect the characteristics of the cash flows of the group of insurance contracts at initial recognition.

Where, during the coverage period, a group of insurance contracts becomes onerous, the Group recognises a loss in profit

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the fulfilment cash flows. The group establishes a loss component for the liability for remaining coverage for such onerous group depicting the losses recognised.

The Group measures the carrying amount of a group of insurance contracts at the end of each reporting period as the sum of:

- (i) the liability for remaining coverage comprising fulfilment cash flows related to future service allocated to the group at that date and the CSM of the group at that date; and
- (ii) the liability for incurred claims for the Group comprised the fulfilment cash flows related to past service allocated to the group at that date.

2.3.23.4.1.3 Reinsurance contracts held – initial measurement

The measurement of reinsurance contracts held follows the same principles as those for insurance contracts issued, with the exception of the following:

- Measurement of the cash flows include an allowance on a probability-weighted basis for the effect of any non-performance by the reinsurers, including the effects of collateral and losses from disputes
- The Group determines the risk adjustment for non-financial risk so that it represents the amount of risk being transferred to the reinsurer
- The Group recognises both day 1 gains and day 1 losses at initial recognition in the statement of financial position as a CSM and releases this to profit or loss as the reinsurer renders services, except for any portion of a day 1 loss that relates to events before initial recognition

Where the Group recognises a loss on initial recognition of an onerous group of underlying insurance contracts or when further onerous underlying insurance contracts are added to a group, it establishes a loss-recovery component of the asset for remaining coverage for a group of reinsurance contracts held depicting the recovery of losses.

The loss recovery component adjusts the carrying amount of the asset for remaining coverage. When the Group enters into reinsurance contracts held which provide coverage relating to events that occurred before the purchase of the reinsurance, such cost is recognised in the profit or loss on initial recognition.

2.3.23.4.1.4 Reinsurance contracts held – Subsequent measurement

The measurement of reinsurance contracts held follows the same principles as those for insurance contracts issued, with the exception of the following:

- Changes in the fulfilment cash flows are recognised in profit or loss if the related changes arising from the underlying ceded contracts have been recognised in profit or loss. Alternatively, changes in the fulfilment cash flows adjust the CSM.
- Changes in the fulfilment cash flows that result from changes in the risk of non-performance by the issuer of a reinsurance contract held do not adjust the contractual service margin as they do not relate to future service.

Any change in the fulfilment cash flows of a retroactive reinsurance contract held due to the changes of the liability for incurred claims of the underlying contracts is taken to profit and loss and not the contractual service margin of the reinsurance contract held.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Where a loss component has been set up subsequent to initial recognition of a group of underlying insurance contracts, the portion of income that has been recognised from related reinsurance contracts held is disclosed as a loss-recovery component.

2.3.23.4.2 Premium Allocation Approach (PAA)

Insurance contracts

This is a simplification of the general model. The Group applies the PAA to the measurement of life and non-life insurance contracts with a coverage period of each contract in the group of one year or less.

Contracts with coverage period above one year which are not immediately eligible for the PAA, were subjected to a PAA eligibility by assessing the expected LRC cashflows under both the PAA and General Model approaches.

At subsequent measurement, the LRC is effectively the unearned premium reserve (UPR) under IFRS 4 less the deferred acquisition costs (DAC). Unlike IFRS 4, DAC will not be presented as an asset under IFRS 17. It is instead reflected in the overall insurance contract liability for remaining coverage, without being identified as a separate component in the balance sheet.

Premium Experience Adjustment: Where premium experience adjustments relate to current/ past service and are treated at the end of the period, this will be immediately recognized in the profit or loss as insurance revenue.

On initial recognition, the Group measures the carrying amount of the Liability for remaining coverage for insurance contracts held as the premiums received - Gross Written premiums (which will be unearned at the start) less the acquisition costs (as the company has chosen not to expense acquisition costs as incurred). The Group has determined that there is no significant financing component in life and non-life insurance contracts with a coverage period of one year or less. The Group does not discount the liability for remaining coverage to reflect the time value of money and financial risk for such insurance contracts.

Insurance acquisition cash flows

Insurance acquisition cash flows arise from the costs of selling, underwriting and starting a group of insurance contracts that are directly attributable to the portfolio of insurance contracts to which the group belongs. These include direct and indirect costs incurred in originating insurance contracts, including cashflows related to unsuccessful efforts to obtain new business.

Under the PAA, an entity can choose to immediately expense insurance acquisition cash flows in the profit or loss when incurred if and only if each insurance contract in a group has a coverage period of one year or less. The Group has opted not to expense acquisition cash flows immediately when incurred.

Alternatively, an entity can recognize insurance acquisition cash flows in the measurement of liability for remaining coverage (LRC) and amortize insurance acquisition cash flows in the profit or loss (systematically - in line with earning pattern of premium revenue OR passage of time, with the former being the method adopted by the Group).

The exiting IFRS 4 approach is to recognize a separate deferred acquisition cost (DAC) assets for costs associated with writing new insurance contracts (e.g., commissions paid to brokers). Under IFRS 17, if acquisition costs are paid before the related insurance groups are recognized, an entity shall recognize an asset. These assets are derecognized when the group of insurance contracts are recognized. If insurance acquisition cash flows are expected to be paid after the related group is recognized, then they are included as part of the measurement of insurance contracts (LRC).

IFRS 17 allows for the deferral of acquisition costs to smooth out the recognition of profits. Paid acquisition costs are an asset that is amortized (or derecognized) when they are included in the measurement of the related group of insurance contracts. The Group has chosen to defer all insurance acquisition cash flows and recognize them over the coverage period of contracts or groups they are attributed to. Therefore, acquisition costs and related revenue are recognized over the same periods and in the same pattern, based on the passage of time.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

It must be noted that IFRS 17 requires allocation to future renewals if the acquisition cashflows are judged to support future renewals. Also the expensing acquisition costs policy choice only applies for contracts with coverage period one year or less.

For contracts measured under PAA in the Group, insurance acquisition costs comprise of costs that are directly attributable to individual contracts or groups of contracts in a portfolio or the portfolio to which the group belongs; with the costs being allocated to groups on a systematic and rationale method e.g., Activity-Based Costing method or based on GWP proportions or claims cost etc.

2.3.23.4.3 Insurance contracts – modification and derecognition

A contract which the Group has assessed and determined to qualify as an insurance contract remains so until all rights and obligations are extinguished (i.e., discharged, cancelled or expired) unless the contract is derecognised because of a contract modification. Hence, the Group derecognizes a contract as a result of extinguishment which could be caused by lapse, claim or outright termination of insurance policy, modification due to surrender, change in sum assured, changes to attaching riders and transfer (which is the transfer of the full risk to a reinsurer).

An insurance contract may be modified, either by agreement between the parties or as a result of regulation. If the terms are modified, the Group derecognises the original insurance contract and recognise the modified contract as a new contract, if and only if, any of the conditions listed below are satisfied.

- If the modified terms were included at contract inception:
 - The modified contract would have been excluded from the scope of IFRS 17.
 - The Group would have separated different components from the host insurance contract resulting in a different insurance contract to which IFRS 17 would have applied.
 - The modified contract would have had a substantially different contract boundary
 - The modified contract would have been included in a different group of contracts at initial recognition (e.g., the contracts would have been onerous at initial recognition rather than having no significant possibility of being onerous subsequently)
- The entity applied the premium allocation approach to the original contract, but the modifications mean that the contract no longer meets the eligibility criteria for that approach.

When a contract modification does not meet any of the conditions above for derecognition, the Group treats any changes in cash flows caused by the modification as changes in the estimates of the fulfilment cash flows.

The Group derecognises insurance contracts when:

- The rights and obligations relating to the contract are extinguished (i.e., discharged, cancelled or expired)
- Or
- Any of the conditions for modifications which result in derecognition are met.

When an insurance contract is extinguished, the Group is no longer at risk and not required to transfer economic resources to satisfy the contract. Therefore, the settlement of the last claim outstanding on a contract does not necessarily result in derecognition of the contract, although it may result in the remaining fulfilment cash flows under a contract being immaterial. For derecognition to occur, all obligations of the Group relating to the contract must have been discharged or cancelled. When the Group purchases reinsurance, it derecognizes the underlying insurance contracts only when those underlying insurance contracts are extinguished.

The Group derecognises an insurance contract from within a group of insurance contracts by applying the following requirements:

- The fulfilment cash flows allocated to the group for both the liability for remaining coverage and the liability for incurred claims are adjusted to eliminate the present value of the future cash flows and risk adjustment for non-financial risk relating to the rights and obligations that have been derecognised from the group
- The contractual service margin of the group is adjusted for the change in fulfilment cash flows described above,

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

to the extent required by the general model

- The number of coverage units for expected remaining insurance contract services is adjusted to reflect the coverage units derecognised from the group, and the amount of the contractual service margin recognised in profit or loss in the period is based on that adjusted number to reflect services provided in the period.

2.3.23.5 Presentation

The Group has presented separately in the statement of financial position the carrying amount of groups of insurance contracts issued that are assets, groups of insurance contracts issued that are liabilities, reinsurance contracts held that are assets and groups of reinsurance contracts held that are liabilities.

Any assets or liabilities for insurance acquisition cash flows recognised before the corresponding insurance contracts are recognised, are included in the carrying amount of the related groups of insurance contracts issued. The Group disaggregates the amounts recognised in the statement of profit or loss and other comprehensive income into an insurance service result, comprising insurance revenue and insurance service expenses, and insurance finance income or expenses. See section 2.3.6.1 for accounting policies on Revenue.

The Group does not disaggregate the change in risk adjustment for non-financial risk between a financial and non-financial portion and includes the entire change as part of the insurance service result. The Group separately presents income or expenses from reinsurance contracts held from the income or expenses from insurance contracts issued.

2.3.24 Investment contract liabilities

Investment contract liabilities are recognised when contracts are entered into and premiums are charged. These liabilities are initially recognised at fair value, this being the transaction price excluding any transaction costs directly attributable to the issue of the contract. Subsequent to initial recognition, the investment contract liabilities are measured at amortized cost.

Deposits and withdrawals are recorded directly as an adjustment to the liability in the statement of financial position and are not recognised as gross premium in the statement of profit or loss.

The liability is derecognised when the contract expires, is discharged or is cancelled. For a contract that can be cancelled by the policyholder, the account value cannot be less than the surrender value.

When contracts contain both a financial risk component and a significant insurance risk component and the cash flows from the two components are distinct and can be measured reliably, the underlying amounts are unbundled. Any premiums relating to the insurance risk component are accounted for on the same basis as insurance contracts and the remaining element is accounted for as a deposit through the statement of financial position as described above.

However, when contracts contain both financial risk component and significant insurance risk component and cash flows from the two components are not distinct and cannot be measured reliably, the underlying amounts are not unbundled but are recognized in the statement of financial position account as insurance contract liabilities.

2.3.25 Deferred revenue

Rental income

Rental income arising from operating leases on investment properties is accounted for on a straight line basis over the lease terms and is included in investment income.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

2.3.26 Taxes

2.3.26.1 Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Current income tax assets and liabilities also include adjustments for tax expected to be payable or recoverable in respect of previous periods. Current income tax relating to items recognised directly in equity or other comprehensive income is recognised in equity or other comprehensive income and not in the profit or loss.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions, where appropriate tax/back duty assessments are recognized when assessed and agreed to by the Group with the Tax authorities, or when appealed, upon receipt of the results of the appeal.

2.3.26.2 Deferred tax

Deferred tax is provided using the liability method in respect of temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

2.3.27 Provisions

General

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the profit or loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability.

Contingent liabilities are possible obligations that arise from past events whose existence will be confirmed only by the occurrence, or non-occurrence, of one or more uncertain future events not wholly within Group's control. Contingent liabilities are not recognized in the financial statements but are disclosed.

Onerous contracts

A provision is recognized for onerous contracts in which the unavoidable costs of meeting the obligations under the contract exceed the expected economic benefits expected to be received under it. The unavoidable costs reflect the least net cost of exiting the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it.

2.3.28 Trade payable

Trade payable (Insurance payables) are recognised when due and measured on initial recognition at fair value of the consideration received less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the EIR method. Discounting is omitted where the effect of discounting is immaterial.

2.3.29 Equity

2.3.29.1 Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are recognised in equity, net of tax as a deduction from the proceeds. Where any member of the Group purchases the Company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs, is reported as a separate component of equity attributable to the Company's equity holders. Where such shares are subsequently sold, reissued or otherwise disposed of, any consideration received is included in equity attributable to the Company's equity holders, net of any directly attributable incremental transaction costs and the related income tax effects.

2.3.29.2 Share premium

Share premium represents surplus on the par value of shares issued. The share premium is classified as an equity instrument in the statement of financial position.

2.3.29.3 Treasury shares

When shares recognised as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs, is recognised as a deduction from equity. Repurchased shares are classified as treasury shares and are presented in the treasury shares reserve. When treasury shares are sold or reissued subsequently, the amount received is recognised as an increase in equity and the resulting surplus or deficit on the transaction is presented within share premium.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

2.3.29.4 Foreign currency translation reserve

The assets and liabilities of foreign operations are translated to Naira at closing functional currency rates at the reporting date. The income and expenses of foreign operations are translated to Naira at spot rates at the dates of the transactions. Foreign currency differences on the translation of foreign operations are recognized in other comprehensive income and accumulated in foreign currency translation reserves in the statement of financial position.

2.3.29.5 Contingency reserve

Non-life business

In compliance with Section 22 (2) (b) of Insurance Act 2003, the contingency reserve is credited with the greater of 3% of total premium or 20% of net profit. This shall accumulate until it reaches the amount greater of minimum paid-up capital or 50 percent of net premium.

Life business

In compliance with Section 22 (1) (b) of Insurance Act 2003, the contingency reserve is credited with the higher of 1% of gross premium or 10% of net profit.

2.3.29.6 Revaluation reserve

Revaluation reserve represents the fair value differences on the revaluation of items of property, plant and equipment as at the statement of financial position date. If an asset's carrying amount is increased as a result of a revaluation, the increase is recognised in other comprehensive income and accumulated in revaluation reserve. The increase is recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss. If an assets carrying amount is decreased as a result of a revaluation, the decrease is recognised in profit or loss, however, the decrease shall be recognised in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in respect of an item of property, plant and equipment is transferred to retained earnings when the asset is derecognised. This involves transferring the whole of the surplus when the asset is retired or disposed. The amount of the surplus transferred is the difference between depreciation based on the revalued carrying amount of the asset and the depreciation based on the asset's original cost. Transfers from revaluation reserve to retained earnings are not made through profit or loss.

2.3.29.7 Fair value reserve

Fair value reserve represents increases or decreases in fair value of equity instruments measured at FVOCI reported directly in other comprehensive income. Gains and losses on these equity instruments are never recycled to profit or loss. The group transfers amounts from this reserve to retained earnings when the relevant equity securities are derecognized.

2.3.29.8 Insurance finance reserve

The insurance finance reserve comprises the cumulative insurance finance income and expenses recognised in other comprehensive income.

2.3.29.9 Retained earnings / (accumulated losses)

This account accumulates profits or losses from operations and reduced by dividends declared alongside other transfers to reserves in line with regulatory requirements.

2.3.30 Earnings per share

The Group presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period excluding treasury shares held by the Company.

Diluted earnings per share amounts are calculated by dividing the net profit by the weighted number of ordinary shares

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

outstanding during the year plus the weighted number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

2.3.31 Retirement obligations and Employee benefits

The Group operates the following contribution and benefit schemes for its employees:

2.3.31.1 Defined contribution pension scheme

The Group operates a defined contributory pension scheme for eligible employees. The Company contributes 10% and the employees contribute 8% of the employees' Basic, Housing and Transport allowances in line with the provisions of the Pension Reform Act 2014. The Company pays the contributions to pension fund administrators. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefits expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

2.3.31.2 Short-term benefits

Wages, salaries, annual leave, bonuses and non-monetary benefits are recognised as employee benefit expenses in the statement of profit or loss and paid in arrears when the associated services are rendered by the employees of the Company.

2.3.32 Significant accounting judgements, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates under different assumptions and conditions. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively. Information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are described below:

2.3.32.1 Insurance and reinsurance contracts – Life Business

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared.

Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

i) The methods used to measure insurance contracts future cash flows

The Company adopted best estimate assumptions to project its future cashflows. It applies discount rates that considers the time value of money and financial risks. In determining the estimates within the contract boundary, the Company considers the expected future lifetime of the policyholder as well as the term of the policy.

The following assumptions were used when estimating future cash flows for different class of the Company's portfolio:

Individual life

The following assumptions are used to estimate the best estimate cashflows:

Mortality assumption

Assumptions are based on standard industry and national tables, according to the type of contract written and the territory in which the insured person resides. They reflect recent historical experience and are adjusted when appropriate to reflect the Company's own experiences. An appropriate, but not excessive, allowance is made for expected future

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

improvements. The Company currently uses best estimate mortality for life business of 90% of the A67/70 life tables. An increase in expected mortality and morbidity rates will increase the expected claim cost which will reduce future expected profits of the Company.

Expense and expense inflation

Operating expenses assumptions reflect the projected costs of maintaining and servicing in-force policies and associated overhead expenses. The current level of expenses is taken as an appropriate expense base, adjusted for expected expense inflation which is derived as such that the inflation assumption is set on a fixed gap to the appropriate bond yield i.e., the central bond rate used in the valuation of policies less (x)% - a gap kept historically for years.

Lapse and surrender rate

A lapse and surrender rate analysis is carried out on the Group's policies to derive best estimate surrender and lapse rates at different durations. The Company derives assumptions about surrender rates based on the Company's own historical experience. Historical surrender rates are derived from the Company's policy administration data. An analysis is then performed based on a 1-year average and on a count, basis compared to the existing long-term rate.

Group life and other one year coverage policy.

Group life policies, Mutual dignity plan, Mutual term assurance, Mutual mutlishield plan, Mutual school fees guarantee scheme, Mutual micro term plus, Mutual multilife plus, credit life assurance are policies with a maximum term of one year and therefore all qualify for valuation under the Premium Allocation Approach (PAA).

Under the Premium Allocation Approach assumptions are required to derive the liability for remaining coverage (LRC) and the liability for incurred claims (LIC).

The LRC at initial and subsequent recognition will be derived using a similar method to the derivation of the Unearned Premium Reserve (UPR) seen under IFRS4.

The LRC is assumed to run down uniformly with the passage of time. At initial recognition it will be equal to the premium received (less acquisition cost if amortised). Therefore, no explicit assumptions are required for the LRC under group life. However, it is influence by the size of the premium which is determined by the pricing basis.

The LIC at initial and subsequent recognition will be the sum of outstanding claims provisions and Incurred but not Reported (IBNR) reserves. No assumptions are required for the outstanding claims provisions as these are known at the date of reporting. Claims development triangles are used to derive the IBNR reserves. Assumptions regarding future claims development and ultimate losses will be required and driven by past experience. Currently the chain ladder method and the bornhuetter- Ferguson (BF) method are employed to derive the IBNR reserve.

ii) Discount rate

The Group's insurance contract liabilities are calculated by discounting expected future cash flows at a risk-free rate, plus an illiquidity premium where applicable. Risk free rates are determined by reference to the yields published by the Nigerian Actuarial Society of highly rated sovereign securities in the currency of the life insurance contract liabilities. The illiquidity premium is determined by reference to observable market rates, including sovereign debt and corporate debt rates.

iii) Risk adjustment for non-financial risk

The risk adjustment for non-financial risk represents the compensation that the Company requires for bearing the uncertainty about the amount and timing of the cash flows of groups of insurance contracts and covers insurance risk, lapse risk and expense risk. The risk adjustment reflects an amount that an insurer would rationally pay to remove the uncertainty that future cash flows will exceed the best estimate amount.

The Company has estimated the risk adjustment using a confidence level (value at risk) approach in which a full IFRS

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

17 liability distribution is generated across all non-financial risks and risk adjustment is calculated as the difference between the best estimate liability and the liability value at the chosen confidence level.

iv) Amortisation of the Contractual Service Margin (CSM)

The CSM is a component of the asset or liability for the group of insurance contracts that represents the unearned profit the Company will recognise as it provides services in the future. An amount of the CSM for a group of insurance contracts is recognised in profit or loss as insurance revenue in each period to reflect the insurance contract services provided under the group of insurance contracts in that period. The amount is determined by:

- Identifying the coverage units in the group
- Allocating the CSM at the end of the period (before recognising any amounts in profit or loss to reflect the insurance contract services provided in the period) equally to each coverage unit provided in the current period and expected to be provided in the future
- Recognising in profit or loss the amount allocated to coverage units provided in the period

The number of coverage units in a group is the quantity of insurance contract services provided by the contracts in the group, determined by considering the quantity of the benefits provided and the expected coverage period. For groups of the Company's life insurance contracts, the quantity of benefits is the contractually agreed sum assured over the period of the contracts. The total coverage units of each group of insurance contracts are reassessed at the end of each reporting period to adjust for the reduction of remaining coverage for claims paid, expectations of lapses and cancellation of contracts in the period. They are then allocated based on probability-weighted average duration of each coverage unit provided in the current period and expected to be provided in the future.

v) Assets for insurance acquisition cashflows

The Company applies judgement in determining the inputs used in the methodology to systematically and rationally allocate insurance acquisition cash flows to groups of insurance contracts. This includes judgements about whether insurance contracts are expected to arise from renewals of existing insurance contracts and, where applicable, the amount to be allocated to groups including future renewals and the volume of expected renewals from new contracts issued in the period.

2.3.32.2 Insurance and reinsurance contracts – Non- Life Business

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

The Company applies the premium allocation approach (PAA) to simplify the measurement of insurance contracts. For cashflows that are not expected to be settled more than one year after the claims is incurred, the company has elected not to discount such cashflows.

i) Liability for remaining coverage

The company uses the following key assumption for its liability for remaining coverage. Earnings pattern for LRC (Liability for Remaining coverage) includes two (2) options under the PAA, they are: Pro rata temporis (passage of time) or Risk based curve

For insurance contracts which automatically qualify for PAA (i.e., with coverage period not exceeding 1 year), the passage of time or pro-rata temporis pattern will be used. This approach is almost identical to the 365th method that is currently used for determining IFRS 4 Unearned Premium Reserves (UPR). However, contracts which automatically qualify for PAA does not necessarily imply that the uniform earnings curve will be appropriate. For example, seasonality of claim incidence under certain class of policy would normally require calibration of the earnings curve. But the default curve will be uniform unless facts and circumstances indicate otherwise, i.e. there is sufficient credible data and grounds that the incidence of risk may not be linear.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

For contracts with coverage period exceeding 1-year, actuarial investigations will be conducted by deriving the claims incidence pattern using historical claims data. Actual observed claims incidence curve is tested for goodness of fit by applying standard statistical techniques. In the absence of credible claims data, an equivalent risk incidence curve will be sourced from our international reinsurers. If external risk curve is not available, then by default a uniform earnings curve will apply.

The selected earnings curve was applied to both insurance and reinsurance contract.

ii) Claims payment pattern for liability for incurred claims

In estimating the claims payment pattern for liability for incurred claims, the company sets:

- An assumption regarding the future timing of claim settlement is required as the IFRS 17 requires the determination of probability weighted future cash flows. Weighted future cash flows will include expected claim payment, expected cost of settling the claims, unallocated claim expenses that are integral to the claim cost but due to system limitations they cannot be allocated to individual claims (e.g. cost of pool of contract cars), legal costs incurred or expected to be incurred for litigated claims, motor recoveries from third party insurers, salvage and subrogation and directly attributable maintenance expenses. For reinsurers' LIC, same cashflows shall apply as described above but the cashflows are apportioned according to reinsurance arrangement. Run off triangles are used to project future claims payment generated by direct insurance contracts and claim recovered from reinsurance contracts. Actual claims paid and outstanding claim reserves are grouped by accident year cohorts. Methodology used for claims reserving is defined by the Company's Reserving Policy and Reserving Guidance, and it relies on the Basic Chain Ladder as well as the Bornhuetter- Ferguson method. Same methodology is applied to claims generated by direct contracts and claim recovered from reinsurance contracts.
- Claim payment pattern will be derived for each reserving class or portfolio (portfolio if there is only one reserving class).
- Basically, the payment pattern provides probabilities to project the settlement of claims in future time periods
- For a given portfolio or reserving class, same payment pattern will be applied to project the payment of OCR (outstanding claim reserve), IBNR reserve and Risk Adjustment estimates over future time periods.
- Existing reserving models (primarily the Basic Chain Ladder) will be used to derive the payment probabilities from the link ratios obtained from paid triangles
- Pattern will be derived once a year, that is, at the year-end valuation. It is expected that same payment pattern will be used in the LIC cashflow modelling for interim valuation periods and roll forward.
- However, for reserving class or portfolios which exhibit significant volatility, payment pattern might be reviewed and revised more frequently and also pattern used in LIC model will need to be updated. A change in payment pattern will lead to a change in fulfilment cashflows arising from non-financial assumption change. This change or delta in fulfilment cashflow will be accounted for as an insurance service expense.
- Changes of payment pattern during a financial year will only be considered if justified by facts and circumstances. Examples of facts and circumstances could be as follows:
 - i. major changes in claim reporting and settlement processes that would invalidate existing payment pattern (e.g. non-life claims backlog can be quite common arising from dispute in settlement amount or change in policy administration system.
 - ii. occurrence of major external systemic events such as a pandemic related lockdown will impact the development factors- hence invalidate existing payment pattern
- It is to be noted that, for consistency, the same payment pattern as used for claim projection will be applied in the projection of Risk Adjustment estimates. The same approach would be used to derive the payment pattern for modelling the LIC cashflows for a portfolio of reinsurance contracts.

iii) Discount rate

The discounting of reserves was conducted using the bottom-up approach. The discount rates were determined based on the yield curve of the government bonds as at year end. Discounting was only applied to the liabilities for incurred claims

iv) Risk adjustment for non-financial risk

The Group has adopted a Value at Risk (VaR) approach to calibrate the size of the Risk Adjustment per class and convert

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

this to a factor which is applied to the present value of future cashflows for each class. The Group adopted a 75% confidence level for the Risk Adjustments determination. For classed of business where the historical claims information was not sufficient to allow for the estimation of the Risk Adjustments in line with the adopted methods, a minimum rate of 10% was adopted for these classes. The minimum rate was approximated based on the overall risk adjustment of the Group's abilities.

2.3.32.3 Expense Allocation

IFRS 17 requires that costs which do not relate to the fulfilment of contracts be excluded in the estimation of fulfilment cashflows. It further requires that overhead costs are allocated to group of contracts using methods that are systematic and rational and are consistently applied to all costs that have similar characteristics.

The Group has adopted an expense allocation policy which splits the Group's expenses into attributable and non-attributable expenses.

2.3.32.4 Fair value of investment property

The valuation of investment properties is based on the price for which comparable land and properties are being exchanged hands or are being marketed for sale. Therefore, the market-approach Method of Valuation. By nature, detailed information on concluded transactions is difficult to come by. The past transactions and recent adverts are being relied upon in deriving the value of the subject properties. At least, eight properties have been analysed and compared with the subject property.

2.3.32.5 Impairment losses on financial assets

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

The Group's internal credit grading model, which assigns PDs to the individual grades

- The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models

2.3.32.6 Fair value of financial instruments using valuation techniques

The Directors use their judgment in selecting an appropriate valuation technique. Where possible, financial instruments are marked at prices quoted in active markets. In the current market environment, such price information is typically not available for all instruments and the company uses valuation techniques to measure such instruments. These techniques use "market observable inputs" where available, derived from similar assets in similar and active markets, from recent transaction prices for comparable items or from other observable market data. For positions where observable reference data are not available for some or all parameters the company estimates the non-market observable inputs used in its valuation models.

Other financial instruments are valued using a discounted cash flow analysis based on assumptions supported, where possible, by observable market prices or rates although some assumptions are not supported by observable market prices or rates.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

3.1 *Management of Insurance and financial risks*

3.1.1 *Insurance risks management*

The principal risk the Group faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Group is to ensure that sufficient reserves are available to cover these liabilities.

The risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements.

The Group purchases reinsurance as part of its risks mitigation programme. Reinsurance ceded is placed on both a proportional and non-proportional basis. The majority of proportional reinsurance is quota-share reinsurance which is taken out to reduce the overall exposure of the Group to certain classes of business. Non-proportional reinsurance is primarily excess-of-loss reinsurance designed to mitigate the Group's net exposure to catastrophe losses. Retention limits for the excess-of-loss reinsurance vary by product line and territory.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Group has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements. The Group's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the Group substantially dependent upon any single reinsurance contract.

(a) *Life insurance contracts*

Life insurance contracts offered by the Group include: whole life, term assurance, annuities plan, anticipated endowment insurance, mortgage protection, Individual Savings and Protection, Child Education, Mutual Education Guarantee Assurance and Keyman assurance policy.

Term Assurance is a form of Life insurance policy that pays out a lump sum (Sum Assured) in the event of the death of the policy holder. The insurance can be extended to cover permanent disability and medical expenses incurred as a result of an accident.

Mortgage Protection policy is a reducing term assurance scheme which guarantees the payment of balance outstanding in respect of the loan given by a financial institution (Mortgage) to a Life Assured (Mortgagor) should he die before the loan is fully repaid.

Endowment assurance policy pays to the beneficiaries of a deceased assured compensation which is equal to the Sum Assured selected by him/her from the commencement of the policy. It also guarantees that the capital sum (Sum Assured) all the accrued reversionary bonuses over the years be paid in the event that he/she survives till the end of the insurance year.

Individual Savings and Protection Plan is an anti-inflationary and income protection plan designed to assist all categories of individual cultivate a consistent savings culture and provide for their beneficiaries at death. A plan holder starts making a compulsory and regular savings for a number of years, which shall not be less than five years. Flexibility in the frequency of the premium payment is allowed.

Annuity Plan is a contract to pay a set amount (the annuity) every month or quarter while the annuitant (the person on whose life the contract depends) is still alive. Annuities are usually expressed in terms of the annual amount payable although in practice they can be payable monthly, quarterly, half-yearly or yearly. There are Immediate Annuity Plan, Deferred Annuity Plan, Guaranteed Annuity Plan, Annuity Certain and Increasing Annuity.

The main risks that the Group is exposed to are as follows:

- Mortality risk – risk of loss arising due to policyholder death/health experience being different than expected
- Longevity risk – risk of loss arising due to the annuitant living longer than expected
- Investment return risk – risk of loss arising from actual returns being different than expected
- Expense risk – risk of loss arising from expense experience being different than expected
- Policyholder decision risk – risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected

These risks do not vary significantly in relation to the location of the risk insured by the Group, type of risk insured or by industry.

The Group's underwriting strategy is designed to ensure that risks are well diversified in terms of type of risk and level of insured benefits. This is largely achieved through diversification across industry sectors and geography, the use of medical screening in order to ensure that pricing takes account of current health conditions and family medical history, regular review of actual claims experience and product pricing, as well as detailed claims' handling procedures. Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Group has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of fraudulent claims. Insurance contracts also entitle the Group to pursue third parties for payment of some or all costs. The Group further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the Group.

For contracts for which death or disability is the insured risk, the significant factors that could increase the overall frequency of claims are epidemics, widespread changes in lifestyle and natural disasters, resulting in earlier or more claims than expected. Group life reinsurance retention limits of ₦25,000,000 on any single life insured and on all high risk individuals insured are in place.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The insurance risk described above is also affected by the contract holder's right to pay reduced premiums or no future premiums, to terminate the contract completely or to exercise guaranteed annuity options. As a result, the amount of insurance risk is also subject to contract holder behaviour.

The following tables show the concentration of life insurance contract liabilities.

Key assumptions

Material judgement is required in determining the liabilities and in the choice of assumptions. Assumptions in use are based on past experience, current internal data, external market indices and benchmarks which reflect current observable market prices and other published information. Assumptions and prudent estimates are determined at the date of valuation and no credit is taken for possible beneficial effects of voluntary withdrawals. Assumptions are further evaluated on a continuous basis in order to ensure realistic and reasonable valuations.

The key assumptions to which the estimation of liabilities is particularly sensitive are, as follows:

► **Mortality and morbidity rates**

Assumptions are based on standard industry and national tables, according to the type of contract written and the territory in which the insured person resides. They reflect recent historical experience and are adjusted when appropriate to reflect the Group's own experiences. An appropriate, but not excessive, prudent allowance is made for expected future improvements. Assumptions are differentiated by sex, underwriting class and contract type.

An increase in rates will lead to a larger number of claims (and claims could occur sooner than anticipated), which will increase the expenditure and reduce profits for the shareholders.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

► Longevity

Assumptions are based on standard industry and national tables, adjusted when appropriate to reflect the Group's own risk experience. An appropriate, but not excessive, prudent allowance is made for expected future improvements. Assumptions are differentiated by sex, underwriting class and contract type. An increase in longevity rates will lead to an increase in the number of annuity payments to be made, which will increase the expenditure and reduce profits for the shareholders.

► Lapse and surrender rates

Lapses relate to the termination of policies due to non-payment of premiums. Surrenders relate to the voluntary termination of policies by policyholders. Policy termination assumptions are determined using statistical measures based on the Group's experience and vary by product type, policy duration and sales trends.

An increase in lapse rates early in the life of the policy would tend to reduce profits for shareholders, but later increases are broadly neutral in effect.

► Discount rate

Life insurance liabilities are determined as the sum of the discounted value of the expected benefits and future administration expenses directly related to the contract, less the discounted value of the expected theoretical premiums that would be required to meet these future cash outflows. Discount rates are based on current industry risk rates, adjusted for the Group's own risk exposure.

A decrease in the discount rate will increase the value of the insurance liability and therefore reduce profits for the shareholders.

Sensitivities

The following sensitivity analysis shows the impact (gross and net of reinsurance held) on contractual service margin, profit before tax and equity for reasonably possible movements in key assumptions with all other assumptions held constant. The correlation of assumptions will have a significant effect in determining the ultimate impacts, but to demonstrate the impact due to changes in each assumption, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear. Sensitivity information will also vary according to the current economic assumptions, mainly due to the impact of changes to both the intrinsic cost and time value of options. When options exist, they are the main reason for the asymmetry of sensitivities. The method used for deriving sensitivity information and significant assumptions made did not change from the previous period.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Claims development table

The following tables show the estimates of cumulative incurred claims, including both claims notified and IBNR for each successive accident year at each reporting date, together with cumulative payments to date.

As required by IFRS 17, in setting claims provisions, the Company gives consideration to the probability and magnitude of future experience being more adverse than assumed which is reflected in the risk adjustment. In general, the uncertainty associated with the ultimate cost of settling claims is greatest when the claim is at an early stage of development. As claims develop, the ultimate cost of claims becomes more certain.

The Company has not disclosed previously unpublished information about claims development that occurred earlier than five years before the end of the annual reporting period in which it first applies IFRS 17. The table below shows the group life triangulation of incurred claims as well as the Ultimate claims

in thousands of Nigerian Naira

(b) **Non-life insurance contracts**

The Group principally issues the following types of general insurance contracts: motor, general accident, Bond, Engineering, Marine, Fire, Aviation and Oil and Gas. Risks under non-life insurance policies usually cover twelve months duration.

For general insurance contracts, the most significant risks arise from climate changes, natural disasters and terrorist activities. For longer tail claims that take some years to settle, there is also inflation risk.

The objective of the Group is to ensure that sufficient reserves are available to cover the liabilities associated with these insurance contracts that it issues. The risk exposure is mitigated by diversification across the portfolios of insurance contracts. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance held arrangements.

Furthermore, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are established to reduce the risk exposure of the Group. The Group further enforces a policy of actively managing and promptly settling claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business. Inflation risk is mitigated by taking expected inflation into account when estimating insurance contract liabilities and pricing appropriately.

The Group purchases reinsurance as part of its risk mitigation programme. Reinsurance held is placed on a proportional basis. Proportional reinsurance is quota-share reinsurance which is taken out to reduce the overall exposure of the Group.

Amounts recoverable from reinsurers are estimated in a manner consistent with underlying insurance contract liabilities. Although the Group has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to reinsurance held, to the extent that any reinsurer is unable to meet its obligations. The Group's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the Group substantially dependent upon any single reinsurance contract.

The table below sets out the concentration of non-life net insurance contract liabilities by type of contract:

31 Dec-2024	GROUP			COMPANY

	15,865,192	(1,557,526)	14,307,666	13,650,538	(1,506,874)	12,143,664

Key assumptions

The principal assumption underlying the liability estimates is that the Group's future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim handling costs, claim inflation factors and claim numbers for each accident year. Additional qualitative judgements are used to assess the extent to which past trends may not apply in the future, for example: one-off occurrence; changes in market factors such as public attitude to claiming: economic conditions: as well as internal factors such as portfolio mix, policy conditions and claims handling procedures.

Change in assumptions and sensitivity analysis

Sensitivity analyses are performed to test the variability around the reserves that are calculated at a best estimate level. The estimated claim amounts can never be an exact forecast of future claim amounts and therefore looking at how these claim amounts can vary can provide valuable information for business planning and risk appetite considerations.

Claims development table

The following tables show the estimates of cumulative incurred claims, including both claims notified and IBNR for each successive accident year at each reporting date, together with cumulative payments to date.

As required by IFRS 17, in setting claims provisions, the Company gives consideration to the probability and magnitude of future experience being more adverse than assumed which is reflected in the risk adjustment. In general, the uncertainty associated with the ultimate cost of settling claims is greatest when the claim is at an early stage of development. As claims develop, the ultimate cost of claims becomes more certain.

The Company has not disclosed previously unpublished information about claims development that occurred earlier than five years before the end of the annual reporting period in which it first applies IFRS 17.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

3.1.2 Financial risks management

Introduction and overview

The Group is exposed to a range of financial risks through its financial instruments, insurance assets and insurance liabilities. The key financial risk is that in the long term its investments proceeds are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of the financial risks are:

- (a) Credit risk
- (b) Liquidity risk
- (c) Market risk

(a) Credit risk

Credit risk is the risk that one party to a financial instrument or reinsurance contract will cause a financial loss for the other party by failing to discharge an obligation.

Mutual Benefits Assurance Group is exposed to risk relating to its loan and receivables, finance lease receivable, statutory deposits, bank balances, debt instruments at amortised cost, financial assets at FVPL, reinsurance receivables and trade receivables. Its receivables comprise trade receivables from customers, reinsurers and coinsurers recoverables and other receivables. There are no financial assets that are classified as past due and impaired whose terms have been negotiated.

The following policies and procedures are in place to mitigate the Group's exposure to credit risk:

The Group's credit risk policy sets out the assessment and determination of what constitutes credit risk for the Group. Compliance with the policy is monitored and exposures and breaches are reported to the Group's risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.

Credit risk relating to financial instruments is monitored by the investments team of the Group. It is their responsibility to review and manage credit risk, including environmental risk for all of counterparties. The Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for industry concentrations, and by monitoring exposures in relation to such limits. It is the Group's policy to invest in high quality financial instruments with a low risk of default. If there is a significant increase in credit risk, the policy dictates that the instrument should be sold and amounts recovered reinvested in high quality instruments.

Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by following policy guidelines in respect of counterparties' limits that are set each year by the board of directors and are subject to regular reviews. At each reporting date, management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy.

The credit risk in respect of customer balances incurred on non-payment of premiums or contributions (trade receivables) will only persist during the grace period specified in the policy document or trust deed until expiry, when the policy is either paid up or terminated. The contractual credit agreement is strictly in line with the regulator's "No Premium, No Cover" policy. Stringent measures have been placed by the regulator to guide against credit default. Credit risk exposure operates from the level of brokered transactions with little emphasis placed on direct business. The Group's credit risk exposure to brokered business is very low as the Group requires brokers to provide credit note which is due 30 days from receipt before incepting insurance cover on behalf of their clients. In addition, commission paid to intermediaries is netted off against amounts receivable from them to reduce the risk of default.

The nature of the Group's exposure to credit risks and its objectives, policies and processes used to manage and measure the risks have not changed from the previous period.

(i) The Group's internal rating process

The Group's investment team prepares internal ratings for instruments held in which its counterparties are rated using internal grades (investment grade, non-investment grade (satisfactory), non-investment grade (unsatisfactory), past due but not impaired, and individually impaired). The ratings are determined incorporating both qualitative and quantitative information that builds on information from risk rating agencies, supplemented with information specific to the counterparty and other external information that could affect the counterparty's behaviour. These information sources are first used to determine whether an instrument has had a significant increase in credit risk. The Group's internal credit rating grades:

Internal rating grade	Internal rating description	Agusto & Co. rating	Basis for ECL	Basis for Interest Income Calculation
		(when applicable)	Provision	
1-2	Investment grade	Aaa	12 month ECL	Gross carrying amount
3	Investment grade	Aa	12 month ECL	Gross carrying amount
4	Investment grade	A	12 month ECL	Gross carrying amount
5	Non-investment grade (satisfactory)	Bbb	Lifetime ECL	Gross carrying amount
6-7	Non-investment grade (unsatisfactory)	Bb	Lifetime ECL	Amortized cost
8-9	Non-investment grade (unsatisfactory)	B	Lifetime ECL	Amortized cost
10	Past due but not impaired	C	Lifetime ECL	Amortized cost
11-12	Individually impaired	D	Lifetime ECL, credit impaired	None

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

(ii) *Maximum exposure to credit risk*

The maximum exposure is shown gross, before the effect of mitigation. The maximum risk exposure presented below does not include the exposure that arises in the future as a result of the changes in values. The credit risk analysis below is presented in line with how the Group manages the risk. The Group manages its credit exposure based on the carrying value of the financial instruments and insurance and reinsurance assets.

Below is the analysis of the group's and company's maximum exposure to credit risk at the year end.

(iv) *Credit collateral*

The Group holds collateral and other credit enhancements against certain of its credit exposures. The following table sets out the principal types of collateral held against different types of financial assets.

Financial assets	Percentage of exposure that is subject to collateral				Principal type of collateral held
	Group		Company		
	2024	2023	2024	2023	
Loans to oil & gas sector	100%	100%	100%	100%	Oil & gas assets.
Loans to construction sector	100%	100%	100%	100%	Real estate properties, inventory.
Loans to policyholders	100%	100%	100%	100%	Cash deposits.
Staff loans	100%	100%	100%	100%	Real estate properties, vehicles, securities.
Finance lease	100%	100%	100%	100%	Underlying assets.

The loan-to-value (LTV) ratio of the financial assets above is not more than 70%. LTV is calculated as the ratio of the gross amount of the loan to the value of the collateral. The valuation of the collateral excludes any adjustments for obtaining and selling the collateral. The value of the collateral for residential mortgage loans is based on the collateral value at origination updated based on changes in house price indices. For credit-impaired loans the value of collateral is based on the most recent appraisals.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

(v) **Impairment assessment**

A summary of the assumptions underpinning the Group's expected credit loss (ECL) model is as stated in Note 2.3.9.

(v) (a) **Significant increase in credit risk, default and cure**

The Group continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12 month ECL or Lifetime ECL, the Group assesses whether there has been a significant increase in credit risk since initial recognition.

The Group considers that there has been a significant increase in credit risk when any contractual payments are more than 30 days past due. In addition, the Group also considers a variety of instances that may indicate unlikelihood to pay by assessing whether there has been a significant increase in credit risk. Such events include:

- Internal rating of the counterparty indicating default or near-default
- The counterparty having past due liabilities to public creditors or employees
- The counterparty (or any legal entity within the debtor's group) filing for bankruptcy application/protection
- Counterparty's listed debt or equity suspended at the primary exchange because of rumours or facts about financial difficulties

The Group considers a financial instrument defaulted and, therefore, credit-impaired for ECL calculations in all cases when the counterparty becomes 90 days past due on its contractual payments. The Group may also consider an instrument to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full. In such cases, the Group recognizes a lifetime ECL.

In rare cases when an instrument identified as defaulted, it is the Group's policy to consider a financial instrument as 'cured' and therefore re-classified out of credit-impaired when none of the default criteria have been present for at least twelve consecutive months.

There has been no significant increase in credit risk or default for financial assets during the year.

(v) (b) **Expected credit loss**

The Group assesses the possible default events within 12 months for the calculation of the 12mECL. Given the investment policy, the probability of default for new instruments acquired is generally determined to be minimal.

In rare cases where a lifetime ECL is required to be calculated, the probability of default is estimated based on economic scenarios.

(v) (c) **Impairment losses on financial investments subject to impairment assessment**

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's internal credit rating system and year-end stage classification. The amounts presented are gross of impairment allowances. Details of the Group's internal grading system are explained in Note 3.1.2 (a) (i).

(b) Liquidity risk

Liquidity risk is the risk that cash may not be available to pay obligations when due at a reasonable cost. The Group mitigates this risk by monitoring cash activities and expected outflows. The Group's current liabilities arise as claims are made and clients request for termination of their investment-linked products. The Group has no material commitments for capital expenditures and there is no need for such expenditures in the normal course of business. Claims payments are funded by current operating cash flow including investment income.

The Group's investment policy requires that a reasonable percentage of the non-life portfolio be held in cash and cash equivalent; this highlights availability of liquid marketable securities sufficient to meet its liabilities as at when due. Cash and cash equivalents include cash in hand, cash at banks and short-term deposits with an original maturity of less than 90 days.

The limits are monitored and reported on a weekly and monthly basis to ensure that exposure of the Group's investment portfolio to this risk is properly managed.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

(c) Market risk

i Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Group's principal transactions are carried out in Naira and its exposure to foreign exchange risk arise primarily with respect to the Pound, US dollar, Euro and CFA Franc.

The Group's financial assets are primarily denominated in the same currencies as its insurance and investment contract liabilities. Thus, the main foreign exchange risk arises from recognised assets and liabilities denominated in currencies other than those in which insurance and investment contract liabilities are expected to be settled.

Mutual Benefits Assurance Plc is exposed to foreign exchange currency risk primarily through undertaking certain transactions denominated in foreign currency. The Group exposure to foreign currency risk through its investment in short term placements and foreign domiciliary bank balance.

Sensitivity analysis

The following analysis is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit before tax and equity due to changes in the fair value of currency sensitive monetary assets and liabilities including insurance contract claim liabilities. The correlation of variables will have a significant effect in determining the ultimate impact of currency risk, but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear. The method used for deriving sensitivity information and significant variables did not change from the previous period.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

ii **Interest-rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Fixed interest rate instruments expose the Group to fair value interest risk. The Group is not exposed to cash flow interest risk and the group do not have floating interest bearing financial instruments.

The Group has no significant concentration of interest rate risk.

iii **Equity price risk**

Equity price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk). The investments of the Group are subject to normal market fluctuations and the risks inherent in investment in financial markets. The Group expoure to equity price risk is insignificant.

3.2 **Capital Management**

The National Insurance Commission (NAICOM), sets and monitors capital requirements for Insurance Companies. The individual subsidiaries are directly supervised by other regulators, i.e, Mutual Benefits Microfinance Bank Limited is regulated by the Central Bank of Nigeria, Mutual Benefits Niger Limited by Conference Interfricaine Des Marches D's assurance (CIMA) and Mutual Benefits Liberia Limited are being regulated by Central Bank of Liberia respectively.

The Group's policy is to maintain a strong capital base to maintain investor, creditor and market confidence and to sustain the future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Group recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position. The Group and its individually regulated operations have complied with all externally imposed capital requirements.

Management uses regulatory capital ratios to monitor its capital base. The allocation of capital between specific operations and activities is, to a large extent, driven by optimisation of the return achieved on the capital allocated. The amount of capital allocated to each operation or activity is based primarily on the regulatory capital, but in some cases the regulatory requirements do not fully reflect the varying degree of risk associated with different activities. In such cases, the capital requirements may be flexed to reflect differing risk profiles, subject to the overall level of capital to support a particular operation or activity not falling below the minimum required for regulatory purposes. The process of allocating capital to specific operations and activities is undertaken independently of those responsible for the operation by Group Risk and Group Credit, and is subject to review by the Group Credit Committee or the Group Asset and Liability Management Committee (ALCO), as appropriate. The Group ensures it maintains the minimum required capital at all times throughout the year. The table below summarises the minimum required capital across the Group and the regulatory capital held against each of them.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Capital management objectives, policies and approach

The Group has established the following capital management objectives, policies and approach to managing the risks that affect its capital position:

- 1 To maintain the required level of stability of the Company thereby providing a degree of security to policyholders;
- 2 To allocate capital efficiently and support the development of business by ensuring that returns on capital employed meet the requirements of its capital providers and of its shareholders;
- 3 To retain financial flexibility by maintaining strong liquidity and access to a range of capital markets;
- 4 To align the profile of assets and liabilities taking account of risks inherent in the business;
- 5 To maintain financial strength to support new business growth and to satisfy the requirements of the policyholders, regulators and stakeholders;
- 6 To maintain strong credit ratings and healthy capital ratios in order to support its business objectives and maximise shareholders value.

In reporting financial strength, capital and solvency are measured using the rules prescribed by the National Insurance Commission. These regulatory capital tests are based upon required levels of solvency, capital and a series of prudent assumptions in respect of the type of business written.

The Company's capital management policy for its insurance business is to hold sufficient capital to cover the statutory requirements based on the NAICOM directives, including any additional amounts required by the regulator.

The Company seeks to optimise the structure and sources of capital to ensure that it consistently maximises returns to the shareholders and policyholders.

The Company has had no significant changes in its policies and processes to its capital structure during the past year from previous years.

3.3 Asset and Liability Management

The Company is exposed to a financial risks through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular, the key financial risk is that in the long-term its investment proceeds are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of this financial risk are liquidity risk and credit risk.

The Company manages these positions within an ALM framework that has been developed to achieve longterm investment returns in excess of its obligations under insurance and investment contracts. Within the ALM framework, the Group periodically produces reports at portfolio, legal entity and asset and liability class level that are circulated to the Group's key management personnel. The principal technique of the Company's ALM is to match assets to the liabilities arising from insurance and investment contracts by reference to the type of benefits payable to contract holders. For each distinct class of liabilities, a separate portfolio of assets is maintained. The Company has not changed the processes used to manage its risks from previous periods.

The Company's ALM is integrated with the management of the financial risks associated with the Company's other classes of financial assets and liabilities not directly associated with insurance and investment liabilities (in particular, borrowings and investments in foreign operations). The notes below explain how financial risks are managed using the categories utilized in the Company's ALM framework.

The table below hypothecates the total assets of the Company into assets that represents insurance funds and shareholders' funds:

3.4 Measurement of financial assets and liabilities

Accounting classification measurement basis and fair value

Set out below is a comparison, by class, of the carrying amounts and fair values of the financial instruments, other than those with carrying amounts that are reasonable approximations of fair values:

31 December 2024 <i>in thousands of Nigerian Naira</i>	Note	Group		Company	
		Carrying amount	Fair value	Carrying amount	Fair value
Financial assets at amortised cost	20.3	67,392,629	65,954,262	13,974,384	13,601,171
		67,392,629	65,954,262	13,974,384	13,601,171

31 December 2023 <i>in thousands of Nigerian Naira</i>	Note	Group		Company	
		Carrying amount	Fair value	Carrying amount	Fair value
Financial assets at amortised cost	20.3	57,453,790	58,605,693	12,420,166	12,824,446
		57,453,790	58,605,693	12,420,166	12,824,446

3.5 Fair value hierarchy

The Group's accounting policy on fair value measurements is discussed under note 2.3.11.

The fair values of financial assets and liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the group determines fair values using other valuation techniques.

For financial instruments that trade infrequently, and had little price transparency, fair value is less objective, and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risk affecting the specific instrument.

Valuation models

The group measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily Nigerian Stock Exchange equity investments classified as trading securities or available for sale. If the fair value cannot be measured reliably, these financial instruments are measured at cost, being the fair value of the consideration paid for the acquisition of the investment or the amount received on issuing the financial liability. All transaction costs directly attributable to the acquisition are also included in the cost of the investment. The group measure its available-sale instrument at costs.

Financial instruments in level 2

Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Financial instruments in level 3

Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The table below analyses financial instruments measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognised in the statement of financial position.

Financial instruments measured at fair value

The following table analyses financial instruments measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised:

31 December 2024 <i>in thousands of Nigerian Naira</i>	Group				Company

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

31 December 2023	Group					Company				
<i>in thousands of Nigerian Naira</i>	Carrying amount	Level 1	Level 2	Level 3	Total	Carrying amount	Level 1	Level 2	Level 3	Total
Financial assets at amortised cost	57,453,790	-	58,605,693	-	58,605,693	12,420,166	-	12,824,446	-	12,824,446
	57,453,790	-	58,605,693	-	58,605,693	12,420,166	-	12,824,446	-	12,824,446

Fair value of financial assets and liabilities

Below are the methodologies and assumptions used to determine fair values for those financial instruments in the financial statements:

Assets and liabilities for which fair value approximates carrying value

The management assessed that cash and cash equivalents, trade receivables, reinsurance receivable, other receivables, trade payables, other liabilities and deposit liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

Loans and receivables and finance lease receivables

The fair values of loans and receivables and finance lease receivables are based on cash flows discounted using a rate based on the market interest rate of borrowings. The discount rate equals the prime lending rate as set by the Central Bank of Nigeria at the reporting dates. The fair values are within Level 2 and 3 of the fair value hierarchy for loans and receivables and finance lease receivables respectively.

Non financial asset measured at fair value

Investment property is a recurring fair value measurement valued using the market approach method of valuation. The valuation of the properties is based on the price for which comparable land and properties are being exchanged and/or are being marketed for sale. Therefore, the market approach Method of Valuation was used. See Note 25 for the details of the description of valuation techniques used and key inputs to valuation on investment properties.

Significant unobservable valuation input:

Price per square metre

Range: (N204,085 - N809,551)

Significant increases (decreases) in estimated price per square metre in isolation would result in a significantly higher (lower) fair value.

<i>in thousands of Nigerian Naira</i>		Group				Company			
		Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Investment property	31 Dec 2024	-	-	5,845,000	5,845,000	-	-	100,000	100,000
Investment property	31 Dec 2023	-	-	4,535,000	4,535,000	-	-	100,000	100,000

During the reporting year ended 31 December 2024, there were no transfers between level 1 and level 2 and in and out of level 3. Further disclosure on the significant unobservable input and movement in fair value are disclosed in Note 3.5.

3.6 Segment information

The Group is organized into three operating segments. These segments distribute their products through various forms of brokers, agencies and direct marketing programs. Management identifies its reportable operating segments by product line consistent with the reports used by the Management Investment and Underwriting Committee. These segments and their respective operations are as follows:

- i **Assurance business:** This segment covers the protection of customers' assets (Particularly their properties, both for personal and commercial business) and indemnification of other parties that have suffered damage as a result of customers accident. All contracts in this segment are short term in nature. Revenue in this segment is derived primarily from insurance premium, investment income, net realised gains on financial assets, and net fair value gains on financial assets at fair value through profit or loss and covers the protection of the Group's customers against the risk of premature death, disability, critical illness and other accidents. Revenue from this segment is derived primarily from insurance premium, investment income, net realized gains on financial assets and net fair value gains on financial assets held for trading.
- iii **Real Estate:** The Group undertakes real estate development project with the aim of outright sale or lease of the properties to meet the needs of individual and corporate bodies. The Group offers various products in real estate to meet client needs while promoting value adding business relationships and utilizes a combination of debt and equity finance to provide funds for projects. Revenue from this segment is derived primarily from property sale, fee income and investment income.
- iv **Microfinance Banking:** The Group undertakes provision of retails and microfinance banking services at the community level. Revenue from this segment is derived primarily interest on micro loans and advances, SME loans, overdraft, fees and commission and investment income.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The segment information provided by the Management Underwriting Investment Committee (MUIC) for the reporting segments for the year ended 31 December 2024 is as follows:

Effective Tax Rate	6%	6%	0%	1%

18 Earnings per share

18.1 Earnings per share - Basic

Basic earnings per share is calculated by dividing the profit for the year attributable to ordinary equity holders of the Company by the weighted average number of ordinary shares in issue during the year, excluding ordinary shares purchased by the Company and held as treasury shares.

in thousands of Nigerian Naira	Notes	GROUP		COMPANY	
		2024	2023	2024	2023
Profit attributable to equity holders		10,751,276	5,847,439	5,646,491	2,986,115
Weighted average number of ordinary shares for basic earnings per share	18.2	20,061,122	20,061,122	20,061,122	20,061,122
Basic earnings per ordinary share (kobo)		54	29	28	15

18.2 Weighted average number of ordinary shares - basic

Issued ordinary shares at 1 January	20,061,622	20,061,622	20,061,622	20,061,622
Effect of treasury shares held at 1 January	(500)	(500)	(500)	(500)
As at 31 December	20,061,122	20,061,122	20,061,122	20,061,122

18.3 Earnings per share- Diluted

The calculation of diluted earnings per share has been based on the profit attributable to ordinary shareholders and the weighted-average number of ordinary shares outstanding after adjustment for the effects of all dilutive potential ordinary shares.

The Company has no potential dilutive ordinary shares during the year (2023: Nil). Hence, the weighted average number of ordinary shares for basic and dilutive is the same so also the Dilutive and Basic earnings/loss per share.

		49,164,513	33,601,485	19,781,495	9,936,341

19.1 Cash and cash equivalents

Cash at banks earns interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements of the Group. All short-term deposits are subject to an average variable interest rate of 13.55% per annum (2023: 8%).

For the purpose of the statement of cash flows, the cash and cash equivalents consist of cash and short-term deposits, as defined above and are subject to insignificant change in fair value, and used by the Group to manage its short term cash commitments.

20 Financial assets

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

These are quoted financial instruments held on lien by the Guaranty Trust Bank, the provider of short-term borrowings, for the purpose of securing the debt. The debt provider maintains possession of the quoted instruments but does not have ownership unless there is a default. Pledged assets are measured at fair value as at year-end.

Mutual Benefits Assurance Plc purchased quoted shares of ₦400 million with a Margin facility granted by Guaranty Trust Bank Plc (see Note 36). There is an on-going litigation on this investment arising from the additional investment cover requested for by the Bank due to the fall in the value of the shares purchased which was rejected by the Company.

The directors, having sought the advice of professional counsel, are of the opinion that no significant liability will crystallise from this litigation therefore, fair value gain/(loss) has been recognized in the consolidated and separate financial statements.

The movement in the carrying amount is the fair value change in respect of the market price as at year end.

		3,143,293	2,741,852	401,363	292,501

* In year 2023, the Group reclassified an amount of N1,039,144,000 from Cash and Cash Equivalent balance to Other Receivables and Prepayments. The reclassified amount represents the fixed-term investments held with Safetrust Mortgage Bank at various times. On 23 May 2023, the operating license of Safetrust Mortgage Bank Limited (the Bank) was revoked vide a Federal Republic of Nigeria Gazette, thereby necessitating the reclassification. Following the revocation, the entire balance held with the Bank of N1,039,144,000 was impaired. However, the Group has filed a claim with the Nigeria Deposit Insurance Corporation (NDIC) to recover the funds.

** These relate to staff housing upfront, receivable on disposal of Mutual Tulip Estate, etc.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

24.4 Expected credit loss on other receivables

28 Property, plant and equipment (Company)

- The Company's land and buildings were valued on 05 January 2023 by Alabi, Ojo & Makinde Estate Surveyors and Valuers (FRC/2015/NIESV/0000001080). The valuation which was based on open market value between a willing buyer and a willing seller produced a net surplus amount of ₦23,282,424.64 which has been credited to the property, plant and equipment revaluation account. As a result of the valuation, the revised value of the properties as at 1 January 2023 was ₦2,417,870,000.

The cost to date at the date of the initial revaluation in 2012 was ₦895,440,000. The property was valued in an open market by reference to the cost approach to value and the Income Approach to value was adopted to cross check the market value.

- If land and buildings were measured using the cost model, the carrying amounts would be as follows:

<i>in thousands of Nigerian Naira</i>	GROUP		COMPANY

31.5.4.1 Reconciliation of Liability for Remianing coverage and liability for incurred claims-CSM- Portfolio level

The tables below present the reconciliation of the measurement component of Insurance contract liabilities on a portfolio level. The disclosure presents the opening to closing balances of the present value of future cash flows, risk adjustment and CSM for portfolios specific to contracts measured using GMM. These Portfolios include Bond, Engineering, Annuities (Deferred and Immediate), and Individual Life products over 1 year

		400,870	400,870	400,870	400,870

36.1 **GTBank margin facility**

The Company obtained a margin loan facility of ₦600 million from Guaranty Trust Bank Plc to finance working capital requirements for Margin trading at 16% per annum on the 19 June 2007 out of which ₦450 million was utilised. The facility was secured by lien on shares financed and an upfront 50% margin contribution (representing a 150% cover). The Bank was to dispose off the warehoused shares to liquidate the facility whenever the cover falls to 130%. Repayment of the facility was to be from proceeds of sale of shares financed.

There is however an on-going litigation on this facility arising from the rejection by the Company of the additional investment cover requested for by the Bank due to the fall in the value of the shares purchased against which the facility was initially secured. In the ensuing litigation, judgment was given in 2017 in favour of the Company at the Lagos High Court in the sum of N120,148,773.70 plus interest at 10% p.a. The total figure stood at N296,224,333 as at 31 December 2024. The bank has appealed the judgment to the Court of Appeal.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

50 Related parties

Parent

Mutual Benefits Assurance Plc (incorporated in Nigeria) is the ultimate parent of the group.

Transactions between Mutual Benefits Assurance Plc and the subsidiaries also meet the definition of related party transactions. Where these are eliminated on consolidation, they are not disclosed in the consolidated financial statements.

Transactions with key management personnel

The Group's key management personnel, and persons connected with them are considered to be related parties for disclosure purposes. The definition of key management includes close members of family of key personnel and any entity over which key management exercise control. The key management personnel have been identified as the executive and non-executive directors of the Group. Close members of family are those family members who may be expected to influence, or be influenced by that individual in their dealings with Mutual Benefits Assurance Plc.

The volume of related party transactions, outstanding balances at the year end, and related expense and income for the year are as follows:

<i>in thousands of Nigerian Naira</i>	GROUP		COMPANY	
	31 Dec-2024	31 Dec-2023	31 Dec-2024	31 Dec-2023
Key management compensation				
Salaries and other short-term benefits	332,438	252,039	151,943	99,093

Mutual Benefits Life Assurance Ltd	Subsidiary	Intercompany	-	687,571

51 Contingent liabilities

Litigation and claims

- i The Company is presently involved in twelve (12) litigations as defendants with estimated claims of ₦2,309,831,905 (2023: ₦1,649,181,757). In the directors' opinion, after taking appropriate legal advice, the outcome of these legal claims will not give rise to any significant loss at 31 December 2024.

In 2012, Mutual Benefits Assurance Company Liberia (MBACL) issued a performance bond in favour of Bea Mountain Mining Corporation (BMMC) in connection with a contract undertaken for BMMC by International Construction Engineering (ICE). In 2014, dispute arose between the parties (BMMC & ICE), resulting in arbitration proceedings in the UK. ICE was adjudged liable for US\$ 6,990,626 and GBP2,700,000 in damages. The Commercial Court in Liberia estimated this judgment, plus accumulated interest, at approximately US\$ 12,000,000 (NGN10,885,320,000) at the end of 2023. Based on an analysis of the facts of the case by MBAL's external legal counsel and an independent counsel, the limit of the liability of MBACL is no more than \$1,072,727 (NGN 1,650,122,308) being the estimate of liability as quantified by BMMC and on which MBACL was sued by BMMC at the Commercial Court Liberia in 2015. The Company's external legal counsel and the independent legal counsel are of the opinion that the extent of MBACL's potential liability in respect of this matter would not be more than US\$1,072,727 (NGN 1,650,122,308). A claim provision of US\$1,072,727 (NGN 1,650,122,308) has been made in the financial statements as at December 31, 2024 (2023: NGN 973,081,552), pending final determination of the matter by the Supreme Court of Liberia.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

ii *Capital commitments*

The Directors are of the opinion that all known liabilities and commitments which are relevant in assessing the Group's and the Company's state of financial affairs have been taken into account in the preparation of these consolidated and separate financial statements.

52 **Contravention**

Default filing of 2023 audited financial statements and 2024 unaudited financial statements to Nigerian Exchange Group (NGX) - NGN 53,640,000.

53 **Event after the reporting date**

On 23 May 2025, the Board of Directors proposed a dividend of N401,232,447.94 (N0.02 (2 kobo) per ordinary share) for the financial year ended 31 December 2024. The proposed dividend is subject to No Objection by NAICOM and approval by shareholders at the next Annual General Meeting of the Company. The proposed dividend has not been recognised as a liability in these financial statements.

Aside from the above, there were no other events after the reporting date that requires disclosure or adjustment in the consolidated and separate financial statements that has not been disclosed or adjusted.

54 **Securities Trading Policy**

In compliance with Rule 17.15 Disclosure of Dealings in Issuers' Shares, Rulebook of the Exchange 2015 (Issuers Rule) Mutual Benefits Assurance Plc maintains a Security Trading Policy which guides Directors, Audit Committee members, employees and all individuals categorized as insiders as to their dealing in the Company's shares. The Policy is regularly reviewed and updated by the Board. The Company has made specific inquiries of all the directors and other insiders and is not aware of any infringement of the policy during the period.

55 **Statement of Investor Relation**

Mutual Benefits Assurance Plc has a dedicated investors' portal on its corporate website which can be accessed via this link <https://www.mutualng.com/plc/about-investor>. The Company's Investors' Relations officer can be reached through electronic mail at investor.relations@mutualng.com or telephone on; +2349054644444 for any investment relation enquiry.
