Property, Plant and Equipment (PPE)

Information relating to movement in property, plant and equipment is shown in Note 14 to the financial statements.

Employment of physically challenged persons

The Company has a policy of fair consideration of job applications by disabled persons having regard to their abilities and aptitude. The Company's policy prohibits discrimination against disabled persons in the recruitment, training and career development of its employees. In the event of members of staff becoming disabled, every effort is made to ensure that their employment with the Company continues and that appropriate training is arranged.

Health, safety and welfare at work

The Company maintains business premises and work environments that guarantee the safety and health of its employees and other stakeholders. The Company's rules and practices in these regards are reviewed and tested regularly. Also, the Company provides free medical insurance for its employees and their families through selected health management organizations and hospitals.

Employee consultation and training

The directors maintain regular communication and consultation with the employees on matters affecting employees and the Company.

Employees are kept fully informed regarding the Company's performance and the Company operates an open door policy whereby views of employees are sought and given due consideration on matters which particularly affect them.

Training is carried out at various levels through in-house and external courses. The Company's skill base has been extended by a range of training provided to the employees whose opportunity for career development within the Company has been enhanced.

Directors' report

For the year ended 31 December 2023

Corporate governance report

Livestock Feeds Plc is a Company of integrity and high ethical standards. Our reputation for honest, open and dependable business conduct, built over the years, is an asset, as are our people and brand. We conduct our business in full compliance with the laws and regulations of Nigeria and UAC Code of Business Conduct.

Donations

The Company made a donation of N3,122 to Orile Agege General Hospital during the year (2022: nil). In compliance with Section 43(2) of the Companies and Allied Matters Act (CAMA), 2020 the Company did not make any donations of gifts to any political parties, political association, or for any political purpose during the year.

Events after the reporting period

There were no significant developments since the balance sheet date which could have had a material effect on the state of the Company at 31 December 2023 and the profit for the year ended on that date which have not been adequately provided for or disclosed in the financial statement.

Independent Auditor

Messrs. KPMG Professional Services having satisfied the relevant corporate governance rules on their tenure in office have indicated their willingness to continue in office as auditors of the Company. In accordance with section 401(2) of the Companies and Allied Matters Act, 2020 therefore, the auditors will be re-appointed at the next annual general meeting of the Company without any resolution being passed.

Statement of directors' responsibilities in relation to the financial statements

For the year ended 31 December 2023

The Directors accept responsibility for the preparation of the financial statements that give a true and fair view in accordance with the IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act,2023.

The Directors further accept responsibility for maintaining adequate accounting records as required by the Companies and Allied Matters Act (CAMA), 2020 and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The Directors have made an assessment of the Company's ability to continue as a going concern and have no reason to believe the Company will not remain a going concern in the year ahead.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Livestock Feeds Plc

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Livestock Feeds Plc (the Company), which comprise:

- the statement of financial position as at 31 December 2023;
- the statement of profit or loss and other comprehensive income;
- the statement of changes in equity;
- the statement of cash flows for the year then ended; and
- the notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2023, and of its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards) and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with International Ethics Standards Board for Accountants *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Nigeria and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Recoverability of Deferred tax assets

See Note 12(iii) to the financial statements

(For the Material accounting policies and critical accounting judgements and estimates – income taxes, see notes 2.2(d) and 3(d) to the financial statements respectively).

Key Audit Matter	How the matter was addressed in our audit
<p>The Company recorded a loss before tax of ₦126 million for the year ended 31 December 2023. This resulted in unutilised tax losses and unabsorbed capital allowances giving rise to a deferred tax assets of ₦234million, which was not recognised as at 31 December 2023.</p> <p>Management prepared the Company's future taxable profits to assess the recoverability of the deferred tax assets to be recognized, and in the preparation of the forecasts, significant assumptions and judgements were applied.</p> <p>Recognition of deferred tax assets involves the assessment of its recoverability within the allowed time frame, availability of sufficient taxable profits in the future and involves significant judgements in the interpretation of tax positions adopted by the Company. Considering the significant judgement involved in determining the recovery of deferred tax assets, this is considered a Key Audit Matter.</p>	<p>The following audit procedures were performed among others:</p> <ul style="list-style-type: none">• We obtained and evaluated the Company's plans for profitability and recoverability of the deferred tax asset, including reviewing the profit forecasts and the underlying data used in preparing the forecasts.• We challenged the key assumptions in the forecast by evaluating the historical forecasting accuracy and comparing the assumptions, such as projected growth rates, with our own expectations of those assumptions based on our knowledge of the industry and our understanding obtained during the audit.• We reviewed management's justifications for not recognizing deferred tax assets.• We assessed the adequacy, completeness, accuracy and relevance of disclosure requirements in line with the relevant accounting standards.

Other Information

The Directors are responsible for the other information. The other information comprises the Corporate Information, Financial Highlights, Report of the Directors, Corporate Governance Report, Report of the Audit Committee, Statement of Directors' responsibilities, Statement of Corporate Responsibility, Certification of Management's Assessment of Internal Control Over Financial Reporting, Management's Report on the Effectiveness of Internal Control Over Financial Reporting, and Other National Disclosures which we obtained prior to the date of the auditor's report but does not include the financial statements and our auditor's report thereon.

Other information also includes the Chairman's statement, shareholders' information together the "Outstanding reports", which are expected to be made available to us after that date.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we have obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Outstanding reports, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of the Directors for the Financial Statements

The Directors are responsible for the preparation of financial statements that give a true and fair view in accordance with IFRS Accounting Standards and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors/Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors/Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors/Audit Committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Compliance with the requirements of Schedule 5 of the Companies and Allied Matters Act (CAMA), 2020

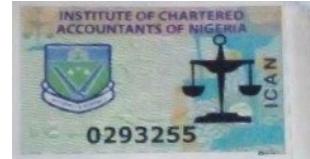

- i. We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
- ii. In our opinion, proper books of account have been kept by the Company, so far as appears from our examination of those books.
- iii. The Company's statement of financial position and statement of profit or loss and other comprehensive income are in agreement with the books of account.

Compliance with FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting

In accordance with the requirements of the Financial Reporting Council of Nigeria, we performed a limited assurance engagement and reported on management's assessment of the Company's internal control over financial reporting as of December 31, 2023. The work performed was done in accordance with ISAE 3000 (Revised) *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* and the FRC Guidance on Assurance Engagement Report on Internal Control over Financial Reporting. We have issued an unmodified conclusion in our report dated 28 March 2024. That report is included on page 17 of the annual report.

Independent Auditor's Limited Assurance Report

To the Shareholders of Livestock Feeds Plc

Report on Limited Assurance Engagement Performed on Management's Assessment of Internal Control Over Financial Reporting

Conclusion

We have performed a limited assurance engagement on whether internal control over financial reporting of Livestock Feeds Plc ("the Company") as of 31 December 2023 is effective in accordance with the criteria established by Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("the COSO Framework") and the Securities and Exchange Commission Guidance on Implementation of Sections 60 – 63 of Investments and Securities Act 2007.

Based on the procedures performed and evidence obtained, nothing has come to our attention to cause us to believe that the Company's internal control over financial reporting as of 31 December 2023 is not effective, in all material respects, in accordance with the COSO Framework and the Securities and Exchange Commission Guidance on Implementation of Sections 60 – 63 of Investments and Securities Act 2007.

Basis for conclusion

We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), *Assurance Engagements Other Than Audits or Reviews of Historical Financial Information* issued by the International Auditing and Assurance Standards Board (IAASB) and the Financial Reporting Council of Nigeria Guidance on Assurance Engagement Report on Internal Control over Financial Reporting. Our responsibilities are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (*including International Independence Standards*) issued by the International Ethics Standards Board for Accountants (IESBA).

Our firm applies International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, issued by the IAASB. This standard requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards, and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Other matter

We have audited the financial statements of Livestock Feeds Plc in accordance with the International Standards on Auditing, and our report dated 28 March 2024 expressed an unmodified opinion of those financial statements.

Our conclusion is not modified in respect of this matter.

Responsibilities for Internal Control over Financial reporting

The Board of Directors of Livestock Feeds Plc is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's report on the effectiveness of internal control over financial reporting. Our responsibility is to express a conclusion on the Company's internal control over financial reporting based on our assurance engagement.

Our responsibilities

The Financial Reporting Council of Nigeria Guidance on Assurance Engagement Report on Internal Control over Financial Reporting ("the Guidance") requires that we plan and perform the assurance engagement and provide a limited assurance report on the Company's internal control over financial reporting based on our assurance engagement.

Summary of the work we performed as the basis for our conclusion.

As prescribed in the Guidance, the procedures we performed included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our engagement also included performing such other procedures as we considered necessary in the circumstances. We believe the procedures performed provide a basis for our report on the internal control put in place by management over financial reporting.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Definition and Limitations of Internal Control Over Financial reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Furthermore, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to the Financial Statements

For the year ended 31 December 2023

1 Corporate information

Livestock Feeds Plc was incorporated on 20th March, 1963 and commenced business on 20th May, 1963. The Company was quoted on the Nigerian Stock Exchange in 1978. The Company is engaged principally in the manufacturing and marketing of animal feeds and concentrates. The registered office of the Company is located at 1 Henry Carr Street, Ikeja Lagos. The parent Company is UAC of Nigeria Plc.

Statement of compliance

The Company's financial statements for the year ended 31 December 2023 have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards), and in the manner required by the Companies and Allied Matters Act (CAMA), 2020 and the Financial Reporting Council of Nigeria (Amendment) Act, 2023. Details of the Company's material accounting policies are included in Note 2.

2 Summary of material accounting policies

Basis of preparation

The financial statement were authorized for issue by the Board of Directors on 27th March 2024. The financial statements are presented in Naira which is the Company's functional currency and all values are rounded to the nearest thousand (N'000), except when otherwise indicated.

a) Basis of measurement

The financial statements have been prepared in accordance with the going concern assumption under the historical cost concept except for the following terms.

Inventories-lower of cost and net realisable Value

Provisions-measured at present value of the obligations

2.2 Summary of material accounting policies

b) Fair value measurement

The Company measures its financial instruments at fair value at each reporting date mainly for disclosure purpose. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability or
- In the absence of a principal market, in the most advantageous market for the asset or liability

Notes to the Financial Statements - Continued

b) Fair value measurement continued

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

c) Revenue from contracts with customers

The Company is into agricultural business for the manufacturing and marketing of animal feeds and concentrates.

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

Notes to the Financial Statements - Continued

Revenue from contracts with customers - continued

The Company has applied IFRS 15 practical expedient to a portfolio of contracts (or performance obligations) with similar characteristics since the Company reasonably expects that the accounting result will not be materially different from the result of applying the standard to the individual contracts. The Company has been able to take a reasonable approach to determine the portfolios that would be representative of its types of customers and business lines. This has been used to categorise the different revenue stream detailed below.

The disclosures of material accounting judgements, estimates and assumptions relating to revenue from contracts with customers are provided in Note 3.

At contract inception, the Company assesses the goods or services promised to a customer and identifies as a performance obligation each promise to transfer to the customer either:

- a good or service (or a bundle of goods or services) that is distinct; or
- a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer.

The Company has identified one distinct performance obligations:

Contract for the sale of feeds and concentrates begins when goods have been delivered to the customer and revenue is recognised at the point in time when control of the goods has been transferred to the customer, generally on delivery of the goods. The normal credit term is 90 days upon delivery.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (if any). In determining the transaction price for the sale of feeds and concentrates, the Company considers the existence of significant financing components and consideration payable to the customer (if any).

i. Significant financing component

Using the practical expedient in IFRS 15, the Company does not adjust the promised amount of consideration for the effects of a significant financing component since Livestock Feeds Plc expects, at contract inception, that the period between the transfer of the promised good or service to the customer and when the customer pays for that good or service will be one year or less.

ii. Variable consideration

If the consideration in a contract includes a variable amount, the Company estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Volume incentives and trade discounts

When customers meet a set target in a particular month the Company gives a volume incentive. Trade discounts that range between 16%-20% are given to customers which is determined at the inception of the contract and are set-off against revenue.

Notes to the Financial Statements - Continued

Rights of return

Some contracts for the sale of Animal feeds provide customers with a right of return and volume rebates. When a contract provides a customer with a right to return the goods within a specified period, the consideration received from the customer is variable because the contract allows the customer to return the products. The Company used the expected value method to estimate the goods that will not be returned. For goods expected to be returned, the Company presented a refund liability and an asset for the right to recover products from a customer separately in the statement of financial position.

Assets and liabilities arising from rights of return.

Refund assets

Refund assets represent the Company's right to recover the goods expected to be returned by customers. The assets is measured at the former carrying amount of the inventory, less any expected costs to recover the goods, including any potential decreases in the value of the returned goods.

Refund liabilities

A refund liability is the obligation to refund some or all of the consideration received (or receivable) from the customer and is measured at the amount the Company ultimately expects it will have to return to the customer.

The Company updates its estimates of refund (and the corresponding change in the transaction price) at the end of each reporting period

Principal vs Agent consideration

When another party is involved in providing goods or services to its customer, the Company determines whether it is a principal or an agent in these transactions by evaluating the nature of its promise to the customer. The Company is a principal and records revenue on a gross basis if it controls the promised goods or services before transferring them to the customer. However, if the Company's role is only to arrange for another entity to provide the goods or services, then the Company is an agent and will need to record revenue at the net amount that it retains for its agency services.

PRACTICAL EXPEDIENTS

Revenue Recognition

Practical expedients

Livestock Feeds Plc (LSF) has elected to make use of the following practical expedients:

- LSF opted for the use of one year or less practical expedients for significant financing component.
- LSF applies the practical expedient in paragraph 121 of IFRS 15 and does not disclose information about remaining performance obligations that have original expected durations of one year or less.

Other income

This comprises majorly profit from sale of plant and equipment,sales of sack, government grant and so on.

Income arising from disposal of items of plant and equipment and scraps is recognised at the time when proceeds from the disposal has been received by the Company.The profit on disposal is calculated as the difference between the net proceeds and the carrying amount of the assets.

Notes to the Financial Statements - Continued

d) Taxes

Current income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity or in other comprehensive income. Current income tax is the estimated income tax payable on taxable income for the year, using tax rates enacted or substantively enacted at the statement of financial position date, and any adjustment to tax payable in respect of previous years.

Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year, and any adjustment to tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date and is assessed as follows:

- Company income tax is computed on taxable profits
- Tertiary education tax is computed on assessable profits
- National Information Technology Development Agency levy is computed on profit before tax
- Nigeria Police Trust Fund levy is computed on net profit (i.e. profit after deducting all expenses and taxes from revenue earned by the company during the year).

Tertiary Education Tax

Tertiary Education Tax is charged on the assessable profit of the Company at the rate of 3%. The assessable profit of the Company is ascertained in the manner specified in the Companies Income Tax Act (CITA). The assessable profit is arrived at by adjusting the profit before tax with non-deductible expenses and non-taxable income based on the Companies Income Tax Act. The Company offsets the tax assets arising from withholding tax credits and current tax liabilities if, and only if, the entity has a legally enforceable right to set off the recognized amounts, and it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Minimum tax

Minimum Tax (determined based on 0.5% of qualifying Company's turnover (revenue) less franked investment income). Taxes based on taxable profit for the period are treated as income tax in line with IAS 12; whereas minimum tax which is based on a gross amount is outside the scope of IAS 12 and therefore, are not presented as part of income tax expense in the profit or loss. The liability is recognised under tax payable in the statement of financial position.

Deferred tax

Deferred tax assets and liabilities are recognised where the carrying amount of an asset or liability differs from its tax base. Deferred taxes are recognized using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes (tax bases of the assets or liability). The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities using tax rates enacted or substantively enacted by the reporting date.

Notes to the Financial Statements - Continued

Taxes - continued

Deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Additional income taxes that arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividend is recognised.

The Company offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Value added tax (VAT)

Expenses and assets are recognised net of the amount of Value added tax (VAT), except:

- When the Value added tax (VAT) incurred on a purchase of assets or services is not recoverable from the tax authority, in which case, the Value added tax (VAT) is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- When receivables and payables are stated with the amount of Value added tax (VAT) included

The net amount of value added tax recoverable from, or payable to, the tax authority is included as part of receivables or payables in the statement of financial position.

National Information Technology Development Agency Levy

National Information Technology Development Agency Levy is computed on Profit before tax but it is not applicable to the Companies in agricultural sector.

Nigeria Police Trust Fund Levy

Nigeria Police Trust Fund Levy is computed on the net profit(i.e profit deducting all expenses and taxes from revenue earned by the Company during the year) and is governed by the Nigeria Police Trust Fund (Establishment) Act,2019.

e) Foreign currencies

In preparing the financial statements of the Company, transactions in currencies other than the entity's presentation currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-translation of unsettled monetary assets and liabilities denominated in foreign currencies are recognised in the statement of profit or loss and other comprehensive income within other operating income.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

The Company does not have non-monetary assets and liabilities denominated in foreign currencies, therefore, there is no accounting policy in place.

Notes to the Financial Statements - Continued

f) Cash dividend

The Company recognises a liability to pay a dividend when the distribution is authorised and the distribution is no longer at the discretion of the Company. Based on the corporate laws of Nigeria, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity. However, where interim dividend is declared by the Board, it is recognised in the liability pending the approval of the shareholders. Dividends for the year that are approved after the statement of financial position date are disclosed as an event after the statement of financial position date where applicable.

g) Property, plant and equipment

Recognition

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. The cost of property, plant and equipment includes expenditures that are directly attributable to the acquisition of the asset. Property, plant and equipment under construction are disclosed as capital work-in-progress.

Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as a separate item of property, plant and equipment and are depreciated accordingly. Subsequent costs and additions are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Capital work in progress are uncompleted projects and they are not depreciated. Depreciation starts when the projects are completed and transferred to the relevant asset class.

All other repairs and maintenance costs are charged to the statement of profit or loss and other comprehensive income during the financial period in which they are incurred. Depreciation is recognised so as to write off the cost of the assets less their residual values over their useful lives, using the straight-line method on the following bases:

Major overhaul expenditure, including replacement spares and labour costs, is capitalised and amortised over the average expected life. The depreciation commences immediately the asset is available for intended use. Depreciation on other assets is calculated using the straight line method to allocate their cost over their estimated useful lives, as follows:

Leasehold Land	5 to 25 years
Building	10 to 33 years
Machinery & Equipment	2 to 10 years
Motor Vehicle	
- Automobile	1 to 10 years
- Truck	3 to 10 years
Computer Equipment	3 to 5 years
Office equipment	3 to 5 years
Capital work in progress	NIL

The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Notes to the Financial Statements - Continued

Derecognition

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefit is expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss within ‘other operating income’ in the year that the asset is derecognised.

The assets’ residual values, useful lives and methods of depreciation are reviewed at each financial year end, with the changes in estimates accounted for prospectively.

h) Intangible assets

Computer software

Purchased computer software is capitalised on the basis of costs incurred to acquire and bring into use the specific software. These costs are amortised on a straight line basis over the useful life of the asset. Computer software are purchased from the third parties. They are measured at cost less accumulated amortisation and accumulated impairment losses.

Expenditure that enhances and extends the benefits of computer software beyond their original specifications and lives, is recognised as a capital improvement cost and is added to the original cost of the software. All other expenditure is expensed as incurred.

Amortisation is recognised in the profit/loss on a straight-line basis over the estimated useful life of the software, from the date that it is available for use. The residual values and useful lives are reviewed at the end of each reporting period and adjusted if appropriate. An Intangible asset’s carrying amount is written down immediately to its recoverable amount if the asset’s carrying amount is greater than its estimated recoverable amount.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible assets, measured are as the difference between the net disposal proceeds and the carrying amount of the assets, are recognised in statement of profit or loss and other comprehensive income when the asset is derecognised. The useful life rate is 33.3%

i) Financial instruments – initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i) Financial assets

No changes were made in the objectives, policies or processes for managing capital during the periods ended 31 December 2023 and 2022.

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset’s contractual cash flow characteristics and the Company’s business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under IFRS 15. Refer to the accounting policies in section (c) Revenue from contracts with customers.

Notes to the Financial Statements - Continued

Financial assets - continued

In order for a financial asset to be classified and measured at amortised cost, it needs to give rise to cash flows that are ‘solely payments of principal and interest (SPPI)’ on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Company’s business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

Financial assets at amortised cost (debt instruments)

The Company measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Company’s financial assets at amortised cost includes trade receivables, and receivables from related parties.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e., removed from the Company’s statement of financial

- The rights to receive cash flows from the asset have expired Or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a ‘pass-through’ arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

Notes to the Financial Statements - Continued

Financial assets - continued

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

The Company recognises an allowance for expected credit losses (ECLs) for all debt instruments and other financial assets not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms (if any).

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL). The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

For trade receivables, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For receivables from related parties (non-trade), and staff receivables, the Company applies general approach in calculating ECLs. It is the Company's policy to measure ECLs on such asset on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL.

The Company considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

The Company calculates ECLs based on a three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

Notes to the Financial Statements - Continued

Financial assets - continued

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- PD The Probability of Default is an estimate of the likelihood of default over a given time horizon.
- EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise.
- LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the Company would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

When estimating the ECLs, the Company considers three scenarios (a base case, an upside, a downside). Each of these is associated with different PDs, EADs and LGDs. In its ECL models, the Company relies on a broad range of forward looking information as economic inputs, such as:

- GDP growth
- Oil price
- Exchange rate
- Inflation rate

Other Financial Assets

Other financial assets relate to 90% of the unclaimed dividend returned by the registrar of the company. This is in compliance with the directives of the Nigeria Securities and Exchange Commission. The amount is placed in a fixed deposit account where a fixed interest rate is earned.

ii) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, amortized cost, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings and are classified at amortised cost.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the statement of profit or loss.

Notes to the Financial Statements - Continued

Financial assets - continued

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Company has not designated any financial liability at fair value through profit or loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate (EIR) method.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

iii) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

j) Inventories

Inventories are stated at the lower of cost and net realisable value, with appropriate provisions for old and slow moving items. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses. Inventory quantities and values will be adjusted for spoilage, spillage and deterioration, expiration and any other loss as soon as it is discovered. Stock assessment must be carried out quarterly and the inventories should be measured at the lower of cost and net realizable value as provided for in IFRS. The comparison of cost and net realizable value should be carried out on an item-by-item basis but, where this is impracticable, groups of similar items shall be considered together. It is however, unacceptable to compare the total net realizable value of all inventories with their total purchase price or production cost. Where the net realizable value of an item is less than its cost, the excess is written off immediately in income statement.

Cost is determined as follows:-

Raw materials and packaging materials

Raw materials and packaging materials include purchase cost and other costs incurred to bring the materials to their location and condition are valued using weighted average cost.

Finished goods

Cost of direct materials and labour plus a reasonable proportion of overheads absorbed by manufacturing based on normal levels of activity.

Spare parts and consumables

Spare parts which are expected to be fully utilized in production within the next operating cycle and other consumables are valued at weighted average cost after making allowance for obsolete and damaged stocks.

Notes to the Financial Statements - Continued

k) Impairment of non-financial assets

Further disclosures relating to impairment of non-financial assets are also provided in the following notes:

- | | |
|---|------------|
| • Disclosures for significant assumptions | Note 3 |
| • Property, plant and equipment | Note 14(a) |
| • Intangible assets | Note 15 |

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Companys of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

l) Cash and bank balances

Cash and short-term deposits in the statement of financial position comprise cash at banks and on hand and short-term highly liquid deposits with a maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and bank balances, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

m) Provisions

A provision is recognized only if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. The provision is measured at the best estimate of the expenditure required to settle the obligation at the reporting date.

Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small. The Company's provisions are measured at the present value of the expenditures expected to be required to settle the obligation.

Notes to the Financial Statements - Continued

n) Contingent liabilities and Contingent assets

A Contingent liability is a possible liability that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within control of the Company, or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligations; or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are only disclosed and not recognized as liabilities in the statement of financial position. If the likelihood of an outflow of resources is remote, the possible obligation is neither a provision nor a contingent liability and no disclosure is made. Contingent assets are possible assets whose existence will be confirmed by the occurrence or non-occurrence of uncertain future events that are not wholly within the control of the entity. Contingent assets are not recognised, but they are disclosed when it is more likely than not that an inflow of benefits will occur.

o) Government grant

Benefits accruing to the Company on government assisted loans granted at a below market rate of interest is treated as a government grant. The benefit of such a government assisted loan is the difference between market rate of interest and the below market rate applicable to the government assisted loan. The grant so measured is recognised as income in the financial statements on a systematic basis over the tenor of the loan.

p) Pension and other post-employment benefits

i) Defined contribution scheme - pension

In line with the provisions of the Nigerian Pension Reform Act, 2014, Livestock Feeds Plc has instituted a defined contributory pension scheme for its employees. The scheme is funded by fixed contributions from employees and the Company at the rate of 8% by employees and 10% by the Company of basic, housing and transport allowance, and invested outside the Company through Pension Fund Administrators (PFAs) of the employees choice.

The Company has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employees' service in the current and prior periods.

The matching contributions made by Livestock Feeds Plc to the relevant PFAs are recognised as expenses when the costs become payable in the reporting periods during which employees have rendered services in exchange for those contributions. Liabilities in respect of the defined contribution scheme are charged against the profit of the period in which they become payable.

Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

q) Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

i) Right -of-use-assets (ROU)

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

Notes to the Financial Statements - Continued

ii) Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

The Company has no lease liability as at 1 January 2023 and 31 December 2023 because all existing leases have been prepaid.

iii) Short-term leases

The Company applies the short-term lease recognition exemption to its short-term leases assets i.e Land and warehouses (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases are recognised as expense on a straight-line basis over the lease term.

r) Segmental reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the internal chief operating-decision maker. The chief operating-decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Livestock Feeds Plc.

The Company's primary format for segment reporting is based on business operating segments. Where applicable, segment results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

The basis of segmental reporting is geographical locations where the Company operates namely Ikeja for South west, Aba mill for South east, Onitsha operations for South south and Jos and Kano for the North.

s) Prepayments:

Prepayments are non-financial assets which result when payments are made in advance of the receipt of goods or services. They are recognized when the Company expects to receive future economic benefits equivalent to the value of the prepayments.

The receipt or consumption of the services is a reduction in the prepayment and a corresponding increase in expense or assets for that reporting period.

2.3 New and amended standards and interpretations

a. Amendments to IFRSs that are mandatorily effective for the current year

In the current year, the Company has applied a number of amendments to IFRSs issued by the International Accounting Standards Board (IFRS Accounting Standards) that are mandatorily effective for an accounting period that begins on or after 1 January 2023.

(i) Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements-Disclosure of Accounting Policies

This amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

Notes to the Financial Statements - Continued

New and amended standards and interpretations - continued

The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed.

Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial.

However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

(ii) Amendments to IAS 8 Definition of Accounting Estimates

The Company has adopted the amendments to IAS 8 Definition of Accounting Estimates for the first time in the current year. The amendment replaces the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". Entities develop accounting estimates if accounting policies require items in the financial statements to be measured in a way that involves measurement uncertainty. The amendments clarify that a change in accounting estimate that results from new information or new developments is not the correction of an error. There was no impact on the Financial Statements from the adoption of this amendment.

(iii) Amendments to IAS 12 Deferred Tax related to Assets and Liabilities from a Single Transaction

The Company has the amendments to IAS 12 for the first time in the current year. The amendments clarify how companies should account for deferred tax on certain transactions. e.g. leases and decommissioning provisions. The amendments narrow the scope of the initial recognition exemption (IRE) so that it does not apply to transactions that give rise to equal and offsetting temporary differences. As a result, companies will need to recognize a deferred tax asset and a deferred tax liability for temporary differences arising on initial recognition of a lease and a decommissioning provision.

(iv) Annual Improvements to IFRS Standards 2018-2020

The Company has adopted the amendments included in the Annual Improvements to IFRS Accounting Standards 2018- 2020 Cycle for the first time in 2022. The Annual Improvements include amendments to four standards.

(a) IFRS 1 First time adoption of International Financial Reporting Standards

The amendment provides additional relief to a subsidiary which becomes a first-time adopter later than its parent in respect of accounting for cumulative translation differences. As a result of the amendment, a subsidiary that uses the exemption in IFRS 1: D16(a) can now also elect to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's consolidated financial statements, based on the parent's date of transition to IFRS Accounting Standards, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary. A similar election is available to an associate or joint venture that uses the exemption IFRS 1: D16(a).

(b) IFRS 9 Financial Instruments

The amendment clarifies that in applying the "10 per cent" test to assess whether to derecognize a financial liability, an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf.

(c) IFRS 16 Leases

The amendment removes the illustration of the reimbursement of leasehold improvements.

Notes to the Financial Statements - Continued

New and amended standards and interpretations - continued

(d) IAS 41 Agriculture

The amendment removes the requirement in IAS 41 for entities to exclude cash flows for taxation when measuring fair value. This aligns the fair value measurement in IAS 41 with the requirements of IFRS 13 Fair Value Measurement to use internally consistent cash flows and discount rates and enables preparers to determine whether to use pre-tax or post-tax cash flows and discount rates for the most appropriate fair value measurement.

2.4 New and revised IFRS Standards in issue but not yet effective

At the date of authorisation of these financial statements, the Company has not applied the following new and revised IFRS Standards that have been issued but are not yet effective. The Company is yet to fully assess the impact the new standards and amendments may have on its financial statements. The Company intends to adopt these standards, if applicable when they become effective.

(i) Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or joint venture is accounted for using the equity method, are recognized in the parents profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the measurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognized in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.

The effective date of the amendments has yet to be set by the IASB; however, earlier application of the amendments is permitted. The directors of the Company anticipate that the application of these amendments may have an impact on the Company's consolidated financial statements in future periods should such transactions arise.

The IASB has decided to defer the effective period of the amendments indefinitely.

(ii) Amendments to IAS 1 Presentation of Financial Statements- Classification of Liabilities as Current or Noncurrent

The amendments to IAS 1 published in January 2020 affect only the presentation of liabilities as current or noncurrent in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items.

The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The amendments are applied retrospectively for annual periods beginning on or after 1 January 2024, with early application permitted.

Notes to the Financial Statements - Continued

New and amended standards and interpretations - continued

(iii) Amendments to IAS 1 Non-current liabilities with covenants

In October 2022, the IASB issued Non-current liabilities with covenants, (Amendments to IAS 1), to clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability so that:

- a. It specifies that if the right to defer settlement for at least 12 months- is subject to an entity complying with conditions after the reporting period, then those conditions would not affect whether the right to defer settlement exists at the end of the reporting period (the reporting date) for the purposes of classifying a liability as current or non-current: and
- b. for non-current liabilities subject to conditions, an entity is required to disclose information about:
 - i. the conditions (for example, the nature of and date by which the entity must comply with the condition);
 - ii. whether the entity would comply with the conditions based on its circumstances at the reporting date; and
 - iii. whether and how the entity expects to comply with the conditions by the date on which they are contractually required to be tested.

IASB tentatively decided to amend IAS 1 to require that an entity present separately in its statement of financial position 'non-current liabilities subject to conditions in the next 12 months' . This line item would include liabilities classified as non-current for which the right to defer settlement for at least 12 months is subject to the entity complying with conditions after the reporting date.

The amendments are effective for reporting periods beginning on or after January 1,2024.

(iv) Amendments to IFRS 16 Lease Liability in a Sale and Leaseback

The IFRS interpretation committee received a submission about IFRS 16 leases and a sale and leaseback transaction with variable payments that do not depend on an index or rate and came to the conclusion (and the IASB agreed) that it would be beneficial to amend IFRS 16 to specify how a seller-lessee should apply the subsequent requirements IFRS 16 to the lease liability that arises in the sale and leaseback transaction. The following are key points to note with regards to the amendments.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment. The amendments are not expected to have a material impact on the Company.

Exception to the general requirements of determination of 'lease payments':

Lease payments as defined in IFRS 16 comprise the following:

- i. fixed payments (including in-substance fixed payments), less any lease incentive;
- ii. variable lease payments that depend on an index or a rate;
- iii. the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; and
- iv. payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease

Variable lease payments that do not depend on an index or rate are not included in the definition of lease payments and these payments are not included in the measurement of lease liabilities.

If the same definition is applied to a leaseback, the seller-lessee, in a leaseback transaction involving variable payments that do not depend on an index or rate, would measure the lease liability without considering these variable payments. That may result in recognition of a gain on the right-of-use retained by the seller-lessee. To prevent this accounting outcome, the amendments create an exception to the definition of 'lease payments' or 'revised lease payments' in a way that the seller-lessee would not recognize any amount of the gain or loss that relates to the right of use retained by the seller-lessee.

Notes to the Financial Statements - Continued

New and amended standards and interpretations - continued

The amendments do not prescribe specific measurement requirements for lease liabilities arising from a sale and leaseback. The seller-lessee may apply other methodologies to determine lease payments subject to the requirements of the amendments i.e., the seller-lessee would not recognize any amount of the gain or loss that relates to the right of use retained by the seller-lessee.

Amendments to IAS 7 and IFRS 7 Supplier Finance Agreement

The amendments requires an entity to disclose qualitative and quantitative information about its supplier finance arrangements, such as terms and conditions-including, for example, extended payment terms and security or guarantees provided.

The IASB decided that, in most cases, aggregated information about an entity's supplier finance arrangements will satisfy the information needs of users of financial statements.

Amongst other characteristics, IAS 7 explains that a supplier finance arrangement provides the entity with extended payment terms, or the entity's suppliers with early payment terms, compared to the related invoice payment due date.

The disclosure requirements are the IASB's response to investors concerns that some companies' supplier finance arrangements are not sufficiently visible, hindering investors' analysis.

The amendments are affective for annual reporting periods beginning on or after 1 January 2024, with transitional reliefs in the first year.

(v) Amendments to IAS 21 Lack of Exchangibility

This amendment was issued by IASB in August 2023.

An entity is impacted by this amendment when it has a transaction or an operation in a foreign currency that is not exchangeable into another currency at a measurement date for a specified purpose. A currency is exchangeable when there is an ability to obtain the other currency (with a normal administrative delay), and the transaction would take place through a market or exchange mechanism that creates enforceable rights and obligations. The lack of exchangeability may occur, for example, because of government imposed controls on capital imports and exports, or the volume of foreign currency transactions that can be undertaken at an official exchange rate is limited. The amendments clarify when a currency is considered exchangeabe into another currency and how an entity estimates a spot rate for currencies that lack exchangeability. The amendments introduce new disclosures to help financial statement users assess the impact of using an estimated exchange rate.

3 Material accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Company's exposure to risks and uncertainties includes:

- Capital management Note 6
- Financial instruments risk management and policies Note 26
- Sensitivity analyses disclosures Note 26

Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

Notes to the Financial Statements - Continued

Material accounting judgements, estimates and assumptions - continued

(a) Determining the lease term of contracts with renewal – Company as lessee

The Company determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Company does not have lease contracts that include extension in the year under review.

(b) Revenue from contracts with customers

The Company applied the following judgements that significantly affect the determination of the amount and timing of revenue from contracts with customers:

Determining the timing of satisfaction of sales of feeds and concentrates

The Company concluded that revenue for sales of feeds and concentrates is to be recognised at a point in time; when the customer obtains control of the goods. The Company assess when control is transferred using the indicators below:

- The Company has a present right to payment for the goods;
- The customer has legal title to the goods;
- The Company has transferred physical possession of the asset and delivery note received;
- The customer has the significant risks and rewards of ownership of the goods; and
- The customer has accepted the goods

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(a) Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs of disposing off the asset. The fair value of the assets of is based on the market value. This is the price which an asset may be reasonably expected to be realised in a sale in a private contract. These estimates are most relevant to intangibles with indefinite useful lives recognised by the Company.

(b) Provision for expected credit losses of trade receivables

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for various customer segments that have similar loss patterns (i.e., by product type, customer type and rating).

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

Notes to the Financial Statements - Continued

Material accounting judgements, estimates and assumptions - continued

The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. The information about the ECLs on the Company's trade receivables is disclosed in Note 17 and 26.4

(c) Depreciation and carrying value of property, plant and equipment

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated useful lives of items of property and equipment will have an impact on the carrying value of these items.

(d) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

4 Revenue from contracts with customers

4.1 Disaggregated revenue information

Set out below is the disaggregation of the Company's revenue from contracts with customers:

Segments	For the year ended 31 December 2023				
	Aba	Ikeja	Onitsha Operations	Northern Operations	TOTAL
	₦'000	₦'000	₦'000	₦'000	₦'000
Type of goods or service					
Sales of livestock feeds	6,109,410	10,503,121	1,292,558	2,504,614	20,409,702

Performance obligations

Information about the Company's performance obligations are summarised below:

Sale of Animal feeds

The performance obligation is satisfied upon delivery of livestock feeds and payment is generally due within 90 days from delivery.

Contract balances		2023	2022
		₦'000	₦'000
Trade receivables	17	267,354	201,928

In 2023, provision for trade receivable is N132.03 Million (2022: N144.08million). The reduction in value in current year relates to 12 million impairment provision no longer require, no amount was recognised as expected credit losses on trade receivables during the year.

Notes to the Financial Statements - Continued

5 Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision-maker has been identified as the Board of Livestock Feeds Plc. The Board members review the Company's internal reporting in order to assess performance and allocate resources. The directors have determined the operating segments based on these reports. Assessment of performance is based on operating profits of the operating segment that is reviewed by the Board. Other information provided to the Board is measured in a manner consistent with that of the financial statements.

The Company generated all its revenue in Nigeria. The Company operates only in the Feed Milling industry hence all information on the statement of profit or loss and other comprehensive income and statement of financial position remains the same with that of the segment information.

	2023	2022
	N'000	N'000
Revenue from contract with customers (Note 14)	20,409,702	16,410,221
Operating profit	469,943	66,927

Finance income (Note 9)	1,244	5,333
Loss before taxation	(126,758)	(781,392)
Minimum tax expense (Note 12 (iv))	(102,417)	(82,830)
Income tax (expense)/credit (Note 12 (i))	(843)	42,004
Total assets	13,376,466	7,457,705
Total liabilities	11,926,227	5,777,448

Revenue

The Company (all segments) produces animal feeds which is 100% of its turnover. Other products include Veterinary Drugs which is bought from other Companies for marketing and sales. All the products have similar risk and returns and are therefore considered as a single segment. Analysis of sales for the year is as follows:

	2023	2022
	N'000	N'000

In the year under review, unallocated operating income and expenses mainly constitute head office other income, administrative and marketing costs. These are considered corporate and are not allocated to any segments expenses. Interest expenses are allocated based on investment in inventory acquired for each mills.

6 Capital management

For the purpose of the Company's capital management, capital includes issued capital, share premium and retained earnings attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company's policy is to keep the gearing ratio below 60% and a minimum B credit rating. The Company includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and bank balances.

	Note	2023 ₦'000	2022 ₦'000

Deferred tax assets	-	-
Deferred tax liabilities	-	-
Deferred tax liabilities/(assets)	-	-

(iv) Current tax liabilities	2023 ₦'000	2022 ₦'000
As of 1 January	95,791	93,591
Income tax expense for the year	843	-
Minimum tax	102,417	82,830
Payment during the year	(82,830)	(80,631)
As at 31 December	116,222	95,791

Minimum tax in current year has been computed based on 0.5% of turnover in line with the Finance Act 2021 and the charge for the year amounts to N102.42 million (2022: N82.83 million).

Notes to the Financial Statements - Continued

13 Earnings per share (EPS)

Basic EPS is calculated by dividing the profit for the year attributable to ordinary equity holders by the weighted average number of ordinary shares outstanding during the year.

Diluted EPS is calculated by dividing the profit attributable to ordinary equity holders by the weighted average number of ordinary shares outstanding during the year adjusted for any dilutive or potentially dilutive instruments.

The following table reflects the income and share data used in the basic and diluted EPS calculations:

	2023	2022
	N'000	N'000
Earnings attributable to ordinary equity holders for basic earnings	(230,018)	(822,218)
	<hr/>	<hr/>
	Thousands	Thousands
Average number of ordinary shares for basic EPS	2,999,999	2,999,999
	<hr/>	<hr/>
Basic earnings per share (Kobo)	(7.67)	(27.41)
	<hr/>	<hr/>
Diluted earnings per share (Kobo)	(7.67)	(27.41)
	<hr/>	<hr/>

There have been no other transactions involving ordinary shares or potential ordinary shares between the reporting date and the date of authorisation of these financial statements.

21.2 Refund liabilities

Refund liabilities (Note 21(i))	6,240	4,924
	593,733	304,265

(i) Refund liabilities

A refund liability is the obligation to refund some or all of the consideration received (or receivable) from the customer and is measured at the amount the Company ultimately expects it will have to return to the customer. The Company updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period. Refer to accounting policy on variable consideration. See breakdown of refund analysis below:

	2023	2022
	₦'000	₦'000
As at 1 January

As at December 31	-	4,966

* The loan addition during the year is made up of N7 billion from First bank and N3 billion from Zenith Bank.

During the year the Company got an enhanced facility of N7 billion at 18% interest rate for 240 days to 270 days and has been fully utilised .The Company renewed the N2 billion Zenith bank facility at 16% interest rate, but now running at 18% . The Company also got an enhancement of N1 billion at 18.5% from Zenith bank which makes the total approved facility to be N3 billion. The Company also liquidated N500 million which was the last tranche of the N2 billion Commercial Agriculture Credit Scheme fund (CACS) in February 2023.

Government Grant is the Savings made on interest paid on N2 billion facilities obtained from Central Bank of Nigeria through Union Bank Plc which is Federal government agriculture intervention fund(CACS). The facility was obtained at an interest rate of 5% but later increased to 9% in September 2022 as against 16% commercial rate applicable at the time the facility was running. The loan has been fully amortized, with the last tranche liquidated in February 2023

The security for these facilities is letter of awareness from UACN Plc.

Trade and other payables here exclude VAT and withholding tax payable

26.3 Fair values

The carrying value of all financial assets and financial liabilities is a reasonable approximation of their fair value due to their current nature and the consequent insignificant of discounting no further fair value disclosures have been made.

26.4 Financial instruments risk management objectives and policies

The Company's principal financial liabilities comprise trade and other payables and Borrowings. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include trade receivables, and cash and bank balances that it derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management is supported by the audit and governance committee of the Board that advises on risks and the appropriate risk governance framework for the Company. The audit and governance committee of the Board provides assurance to the Company's senior management that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below.

Risk	Exposure arising from	Measurement	Management
Market risk – foreign exchange	Future commercial transactions, Recognised financial assets and liabilities not denominated in Naira units	Cash flow forecasting Sensitivity analysis	Contractual agreements on exchange rates
Market risk – interest rate	Long-term borrowings at variable rates	Sensitivity analysis	Interest rate negotiations
Credit risk	Cash and cash equivalents, trade receivables.	Aging analysis Credit ratings	Diversification of bank deposits, credit limits and letters of credit. Investment guidelines and held-to-maturity investments.
Liquidity risk	Borrowings and other liabilities		Availability of committed credit lines and borrowing facilities.

Notes to the Financial Statements - Continued

Financial instruments risk management objectives and policies - Continued

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include deposits and loans and borrowings.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to this risk as the Company has no long-term debt obligations at variable rates and does not account for any fixed rate instruments at fair value through profit or loss.

Foreign Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a foreign currency). The Company's exposure to foreign currency risk at the end of the reporting period expressed in the individual foreign currency unit was as follows:

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions.

Management monitors rolling forecasts of the Company's liquidity reserve and cash and bank balances (Note 19) on the basis of expected cash flows.

This is generally carried out at each of the respective mills in accordance with practice and limits set by the Company. These limits vary to take into account the liquidity of the market in which the entity operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

Year ended 31 December 2023

	On demand ₦'000	Less than 3months ₦'000	3 to 12 months ₦'000	1 to 5 years ₦'000	> 5 years ₦'000	Total ₦'000

Credit risk

Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions, as well as credit exposures to related parties and to customers, including outstanding receivables.

Notes to the Financial Statements - Continued

Financial instruments risk management objectives and policies - Continued

(i) Risk management

Credit risk is managed on a Company basis. For banks and financial institutions, only independently rated parties with a minimum national rating of 'A' are accepted.

There is no independent rating for customers. Risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. The compliance with credit limits by customers is regularly monitored by line management.

Sales to customers are required to be settled in cash or using major credit cards, mitigating credit risk. There are no significant concentrations of credit risk, whether through exposure to individual customers, specific industry sectors and/or regions. The credit ratings of the investments are monitored for credit deterioration.

(ii) Security

No security is obtained for trade receivables either in the form of guarantees, deeds of undertaking or letters of credit which can be called upon if the counterparty is in default under the terms of the agreement. However, some customers are required to provide postdated cheques for credit transactions while others are granted credit on the strength of their credibility and past performances. In the case of default, unpaid balances are set off against security deposit while others are referred to debt collection agents.

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates. There are no credit ratings for Livestock feeds plc trade and other receivables. Credit ratings from Global Credit Rating Co. (GCR) are highlighted below:

	2023	2022
	N'000	N'000
Cash at bank and short-term bank deposits A+(nga)	597,127	355,621
equivalents	130	46
receivables	1,676,581	905,079
Maximum credit exposure	2,273,838	1,260,746

(iii) Impairment of trade receivables

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due of various customer segments with similar loss patterns (i.e., by geographical region, product type and customer type). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally, trade receivables are written-off if past due for more than one year and are not subject to enforcement activity. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed in Note 17. The Company does not hold collateral as security. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several states, unrelated and diverse.

Notes to the Financial Statements - Continued

For the year ended 31 December 2023

26.4 Financial instruments risk management objectives and policies - continued

Set out below is the information about the credit risk exposure on the Company's trade and other receivables using a provision matrix:

	31-Dec-23	Current	Days past due			Total ₦'000
			<90 days	90–180 days	180–360 days	
			₦'000	₦'000	₦'000

Balance at 31 December	<u>(132,030)</u>	<u>(144,077)</u>

Notes to the Financial Statements - Continued

For the year ended 31 December 2023

26 Financial instruments risk management objectives and policies - continued

Impairment allowance for financial assets

In assessing the Company's internal rating process, the Company's customers and counter parties are assessed based on a credit scoring model that takes into account various historical, current and forward-looking information such as:

- Any publicly available information on the Company's customers and counter parties from Internal parties. This includes Internal rating grades issued by rating agencies, independent analyst reports, publicly traded bond or press releases and articles.
- Any macro-economic or geopolitical information, e.g., GDP growth relevant for the specific industry and geographical segments where the client operates.
- Any other objectively supportable information on the quality and abilities of the client's management relevant for the Company's performance.

The Company monitors its risk of a shortage of funds using a liquidity planning tool.

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

In order to avoid excessive concentrations of risk, the Company's policies and procedures include specific guidelines to focus on the maintenance of a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly.
